

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Poland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a great question, and it's awesome that you're thinking seriously about your next steps. Since you've just finished primary school (9th grade in Denmark), you now have a few main paths to choose from in the Danish education system. Here's a breakdown of your main options, followed by some advice tailored to your situation:

🎓 Main Educational Paths After Primary School (Folkeskole):

1. Gymnasiale Uddannelser (Upper Secondary Education – Academic)

- **STX (Almen studentereksamen)** – Broad general education (focus on humanities, science, and social studies).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and IT.
- **HF (Højere forberedelseksamen)** – Shorter, 2-year program. More practical and often used if you want a quicker route to higher education.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship. Leads to careers like electrician, carpenter, hairdresser, chef, etc.
- Can also be a route to higher education later (via EUX or further education).

3. EUX (Combination of EUD + gymnasial)

- Allows you to become a skilled worker **and** qualify for university or other higher education.

4. 10th Grade

- Optional extra year after 9th grade.
- Useful if you want more time to decide, improve grades, or get ready for upper secondary/vocational programs.

🕒 What Should You Consider?

Here are some questions to help guide your decision:

- **What are you interested in?** (Science, business, technology, arts, hands-on work?)
- **Do you enjoy school and academic subjects?**
- **Do you want to go to university later, or start working sooner?**

- **Would you enjoy a mix of school and work (like in EUD/EUX)?**

Recommendations Based on Your Background

Since you're fluent in Danish and have completed Danish primary school, you're fully eligible for any of the paths. Here are a few tailored suggestions:

If you're interested in further studies or university later:

- **STX** – If you like a wide range of subjects and want to keep your options open.
- **HHX** – If you're interested in business, marketing, or economics.
- **HTX** – If you like science, technology, or engineering.
- **EUX** – If you want to become a skilled worker **and** keep the door open to university.

If you prefer hands-on learning or want to work sooner:

- **EUD** – If you have a specific job in mind (mechanic, chef, hairdresser, etc.)
- **EUX** – If you like the idea of a skilled job but also want a full education.

If you're unsure and want more time:

- **10th Grade** – Could be a great option to mature, explore your interests, or prepare better.

Bonus: Using Your Polish Background

Being bilingual and bicultural is a big asset! In the future, this could be useful in fields like:

- Translation or interpretation
- International business
- Diplomacy or EU work
- Working in companies that trade with Poland or other countries

Summary:

Here are 3 strong paths you could consider, depending on your interest:

Path	Best for...	Leads to...
STX/HTX/HHX	Academic interests	University or other higher education
EUX	Academic + practical	Skilled work or university
10th Grade	If you're unsure or want a bit more time	Any of the above after 1 year

If you tell me more about your interests (what subjects you like, your goals), I can give even more specific advice.
