

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Poland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that. It's great you're thinking ahead — and being fluent in Danish gives you full access to all the educational opportunities Denmark offers. Here's a breakdown of your main options after finishing primary school (folkeskole), followed by a recommendation based on your background and potential interests.

Main Educational Paths in Denmark After Folkeskole (typically 9th or 10th grade):

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for university:

- **STX (Almen Studentereksamen)** – broad academic program (languages, sciences, humanities).
- **HHX (Højere Handelseksamen)** – focused on business, economics, marketing.
- **HTX (Højere Teknisk Eksamen)** – focused on technology, IT, and science.
- **HF (Højere Forberedelseksamen)** – shorter (2 years), more direct path to certain university programs. Often for older students or those who want a faster route.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship.
- Leads to becoming a skilled worker (e.g. electrician, carpenter, chef, social and healthcare assistant).
- Often good if you like practical, hands-on learning.

3. Kombinerede Forløb (EUX)

- A mix of vocational training and academic subjects.
- You become a skilled worker **and** get a studentereksamen.
- Opens doors to both work and university later.

Things to Consider Based on Your Background and Interests:

- If you're **interested in university or academic careers** (like law, medicine, science, business, teaching), **STX, HHX or HTX** are the best paths.

- If you're **interested in a job quickly** and enjoy **working hands-on**, a vocational education (EUD or EUX) might be a good fit.
- If you're **still unsure**, many students choose **STX** as it keeps the most options open.
- Being **bilingual (Polish-Danish)** could be a huge asset in business, diplomacy, translation, or health/social work with international communities.
- If you're **interested in entrepreneurship or economics**, HHX might suit you well — especially given Poland's growing economic ties with Denmark.

Recommendation

Based on your situation (bilingual, finished Danish primary school, living in Denmark, parents from Poland, 16 years old), I recommend:

Consider starting in STX or HHX unless you have a strong interest in a specific trade or hands-on job (in which case EUX is a great option).

- **STX** gives the broadest foundation and is good if you're not yet sure what you want to study later.
- **HHX** is ideal if you're business-minded and curious about economics, marketing, or international trade (especially useful with your Polish background).
- If you're into tech, **HTX** is a strong route.

If you want, I can help you:

- Compare specific programs at schools near you
- Suggest fields of study based on your interests
- Think long-term about university or career plans

Just let me know!
