

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Portugal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Based on your background—16 years old, born and raised in Denmark, fluent in Danish, with Portuguese roots—it's great that you're thinking seriously about your future. You've got options, and the Danish education system gives you flexibility depending on your interests, learning style, and career goals.

Here are the **main educational paths** available to you after finishing *folkeskolen* (primary and lower secondary school):

🎓 1. Gymnasiale uddannelser (Upper Secondary General Education)

These are academic paths that prepare you for university or other higher education.

A) STX (Almen studentereksamen) – General upper secondary school

- Broad education (sciences, languages, social sciences, etc.)
- Good if you're not sure yet what you want to study later
- 3 years
- Leads to university or other higher education

B) HHX (Højere handelseksamen) – Business-oriented

- Focus on economics, business, and languages
- Good if you're interested in business, international trade, marketing
- 3 years

C) HTX (Højere teknisk eksamen) – Technical focus

- Emphasis on technology, natural sciences, and IT
- Good if you like tech, innovation, or engineering
- 3 years

D) HF (Højere forberedelseksamen) – Shorter academic path

- 2 years (or 3 with extra preparation)
- More practical and less theoretical than STX

- Good if you want a quicker route to further education

2. Erhvervsuddannelser (EUD) – Vocational Education and Training

- Learn a trade while also studying some academic subjects
- You combine school with apprenticeship/workplace training
- Examples: electrician, carpenter, chef, healthcare worker, mechanic
- Takes 2–5 years depending on the program
- Good if you want to work soon or prefer hands-on learning

You can also take **EUX**, a hybrid path that gives you both a vocational qualification *and* general qualifications for higher education.

3. 10. klasse – Optional extra year

If you're unsure or want more time to decide, you can take 10th grade, often offered with different focuses (e.g., international, creative, practical, etc.). This gives you a chance to mature, explore interests, or improve grades.

How to Choose?

Ask yourself:

- Do I enjoy school and want to study at university later? → STX/HHX/HTX/HF
- Am I more practical and want to work with my hands? → EUD or EUX
- Do I want to keep doors open while still getting some work experience? → EUX or HHX
- Do I need more time to decide or improve academically? → 10. klasse

Bonus: Your Portuguese Background

- You could consider combining your studies with language/literature options in Portuguese or even exchange programs with Portugal.
- Having two cultures is a huge asset—consider international programs if you're interested in working across borders later (like International STX or HHX with languages).

Would you like help comparing specific schools or programs near where you live? Or do you already have an idea of what kind of career or subjects interest you?
