

Uddannelsesvalg efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Qatar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that – and congratulations on finishing primary school! Since you're in Denmark and just finished **Folkeskole (9th or 10th grade)**, you're now at an important crossroads with several educational paths to choose from, depending on your interests, strengths, and long-term goals.

Here are the **main options** in Denmark after primary school, and some guidance based on your background:

🎓 1. Gymnasiale uddannelser (Upper Secondary General Education)

These are academic programs that prepare you for university.

- **STX (Studentereksamen)** – Broad academic focus (science, humanities, languages, etc.)
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and engineering
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more practical and flexible

✅ Recommended if:

- You're interested in **university later on**
- You enjoy subjects like **science, languages, business, or humanities**
- You want to keep your options open

🔥 Advice for you:

If you're good academically and want to keep university as an option, **STX** or **HHX** could be great choices – especially since you're fluent in Danish and have a multicultural background (which can be a big asset in business, international studies, or diplomacy).

🔧 2. EUD/Erhvervsuddannelser (Vocational Education and Training)

You get hands-on training and often an apprenticeship. Examples: electrician, hairdresser, carpenter, social and health care worker.

✅ Recommended if:

- You prefer **practical work**
- You want to **start earning sooner**
- You're interested in a skilled trade or technical career

Advice for you:

This is a solid path if you enjoy **working with your hands**, want **job security**, or are interested in something like **IT-support**, **mechanics**, or **healthcare**.

3. Kombineret ungdomsuddannelse (KUU) / FGU (Forberedende Grunduddannelse)

These are more supportive programs for students who need a bit more help before choosing a main path.

Recommended if:

- You didn't get high marks or need time to figure out what fits you
- You want a gentler introduction to work or further education

BONUS: Use Your Background

As someone with Qatari roots and fluent Danish, you could consider:

- **Learning Arabic formally** (useful in international business, translation, or diplomacy)
- Exploring future opportunities with **international NGOs**, **multinational companies**, or **studying abroad** later
- Taking advantage of **diversity scholarships or exchange programs**

How to Decide?

Ask yourself:

- Do I enjoy **books and theory** or **doing things in real life**?
- Do I want to go to **university**?
- Do I have a dream job in mind?

If you're unsure, consider doing:

- **Brobygning (Bridge courses)** in 10th grade
- Talking to a **UU-vejleder** (educational advisor)
- Asking to **visit schools** for open house days

Summary: My General Recommendation

Since you're academically capable (you write very well), fluent in Danish, and just finished primary school, I'd recommend this:

- ◆ **Start with STX or HHX**, depending on whether you're more into general knowledge or business. This keeps university as an option and gives you time to explore interests.

Would you like help comparing **STX vs. HHX**? Or do you have an idea of what career or subject you're drawn to?
