

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (Folkeskole), you're at an important turning point in your education. Here are the main paths available to you, along with some personalized guidance based on your background and potential goals:

Main Educational Paths After Folkeskole in Denmark

1. Gymnasium (General Upper Secondary Education)

- **Options:** STX (general), HHX (business), HTX (technology), HF (shorter academic track)
- **Duration:** 2–3 years
- **Purpose:** Prepares you for university or other higher education
- **Best for you if:**
 - You enjoy academic subjects (languages, science, social studies, etc.)
 - You might want to go to university later
 - You're unsure of your future job and want to keep your options open

2. EUD/Erhvervsuddannelse (Vocational Education and Training)

- **Duration:** 3–5 years, often including apprenticeships
- **Purpose:** Trains you for a specific job (electrician, carpenter, hairdresser, etc.)
- **Best for you if:**
 - You prefer hands-on learning
 - You want to start working sooner in a skilled profession
 - You're not that interested in going to university

3. EUX (Combined Academic and Vocational Education)

- **Duration:** 4–5 years
- **Purpose:** Combines vocational training with academic subjects; allows access to university and gives you a profession
- **Best for you if:**
 - You want job skills *and* the option to study at university later

- You're interested in technical or business careers

Things to Consider Based on Your Background

Language & Cultural Advantage

- You're fluent in Danish, but also likely understand Korean culture and maybe even the language — that's a big plus in fields like international business, translation, diplomacy, or tech.

If You're Interested in...

- **Tech / Engineering:** HTX or EUX with a tech focus
- **Business / Trade:** HHX or EUX business line
- **University in the Future:** STX, HTX, HHX, or EUX
- **Work Earlier / Skilled Trades:** EUD (e.g., electrician, chef, etc.)
- **Creative Arts:** STX with arts focus or special programs

Recommendation

If you're still unsure:

1. **Visit open house events** at nearby gymnasiums and vocational schools.
2. **Talk to a UU-vejleder (Youth Guidance Counselor)** – they're super helpful and free.
3. **Consider a 10th grade (10. klasse)** if you want a transition year to figure things out or improve your grades.

Summary of Options Based on Your Goals

Goal	Recommended Path
Keep doors open for university	STX, HHX, or HTX
Start working faster with skills	EUD
Get both work skills + uni access	EUX
Explore and decide later	10. klasse , then choose

If you tell me more about your interests (e.g., do you like math, working with people, tech, business, art?), I can help narrow it down even further.
