

Uddannelsesvalg efter 9. klasse

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Moldova. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that's a great starting point. Since you've just finished primary school in Denmark (which typically ends after **9th grade**), you now have several options depending on your interests, goals, and strengths. Here's a breakdown to help guide you:

First, ask yourself:

1. What are your interests?

- Do you like working with people, solving problems, creating things, or working with your hands?

2. What are your strengths?

- Are you more academic, practical, creative, or technical?

3. Do you want to go to university someday?

- Or would you prefer starting work sooner or learning a skilled trade?

Main Educational Paths in Denmark after 9th Grade:

1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're aiming for **university** later on.

Options:

- **STX** (*Studentereksamen*) – Broad academic education (humanities, sciences, social sciences).
- **HHX** – Focus on business, economics, and marketing.
- **HTX** – Focus on technology, natural sciences, and IT.
- **HF** – Shorter (2 years), more flexible path – often for students who want to go to university later but prefer less pressure.

♦ *Recommended if you enjoy studying and want to keep your options open for university.*

2. EUD / EUX (Vocational Education and Training)

If you want to learn a trade or profession — either to work right after or **combine it with academic studies**.

✓ Options:

- **EUD** – Learn a specific trade (like electrician, hairdresser, carpenter, social & healthcare).
- **EUX** – Mix of vocational training and academic classes; gives you both a trade and the right to apply to university.
- ♦ *Great if you're practical-minded and want job skills AND the option for further education later.*

3. 10. klasse

If you want **more time to decide** or need to improve your grades or maturity before choosing gymnasial or vocational education.

- ♦ *A good "pause" year to grow, reflect, and explore — especially helpful if you're unsure or need a stronger academic foundation.*

A Few Danish-Specific Tips:

- **You're fluent in Danish** – that's a huge plus for fitting into any Danish education path.
- Your Moldovan background could be an asset: bilingualism and multicultural perspective are valued.
- In Denmark, it's common and accepted to take a little extra time to figure things out — don't feel rushed.

What I'd Recommend:

Given your age (16) and background, here are **three realistic paths** depending on your interests:

➤ If you enjoy school, are curious, and might want university:

→ **STX** or **HTX** (if you're into science/tech).

➤ If you're interested in business, economy, or marketing:

→ **HHX**.

➤ If you're practical, want to learn a trade, or start working earlier:

→ **EUX** (so you still keep your university options open).

➤ If you're unsure or need a breather:

→ **Take 10th grade** (at a regular school or an efterskole – a great Danish experience!).

If you'd like, I can help you compare specific programs or give examples based on your interests (e.g., IT, health, construction, business). Just let me know what you enjoy doing or thinking about!
