

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Romania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's really good that you're thinking seriously about your future at this stage. Since you've finished **primary school** (in Denmark, that typically means **Folkeskolen** up to 9th or 10th grade), you now have several **educational paths** available depending on your **interests, strengths, and career goals**.

Here's a breakdown of your main options in Denmark after primary school:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

Goal: Prepares you for university or other higher education.

Length: 3 years.

Types:

- **STX (Alment gymnasium)** – Broad academic subjects (good if you're unsure or want to keep many options open).
- **HHX (Handelsskole)** – Focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – Focus on science, tech, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, for those who want access to further education faster.

✓ Recommended if:

- You enjoy school and academic subjects.
- You think you may want to attend university later.
- You're not quite sure what to do yet and want to keep options open.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - VET/EUD)

Goal: Combines school and apprenticeship to lead directly to a profession.

Length: 2-5 years depending on the program.

Examples: Electrician, carpenter, hairdresser, mechanic, healthcare assistant, chef, etc.

✓ Recommended if:

- You like practical, hands-on learning.
- You want to start working earlier.

- You have a specific trade or job you're interested in.

♦ 3. EUX (Kombineret erhvervsuddannelse + gymnasial eksamen)

Goal: Gives you a **vocational education AND a general upper secondary diploma**.

✓ Recommended if:

- You want the practical path of EUD **but also want the option to go to university later**.
- You're hardworking and can handle a more intense program.

♦ 4. Other paths

- **10th grade:** Optional extra year if you're unsure what to choose next, want to improve grades, or mature a bit more.
- **Efterskole:** A one-year school where you live away from home; offers personal development, friendships, and time to explore interests.
- **International education (like IB):** Good if you're thinking globally or want to study abroad in the future.

What to consider when choosing:

1. **What subjects do you enjoy?** (Math? Languages? Technology? Arts?)
2. **Do you prefer theory (books, lectures) or practice (hands-on learning)?**
3. **Do you want to work as soon as possible, or study longer and keep more options open?**
4. **Would you be interested in running a business someday? Working in tech? Healthcare? Engineering? Design?**

✓ Personalized advice (based on your situation):

Since you're:

- Fluent in Danish
- Danish-born with a Romanian background
- Just finishing primary school
- Open to suggestions

If you're **not yet sure what career you want**, I would **recommend STX or HTX** — they keep many doors open and give you 3 years to figure out what direction to take.

If you already know you like **working with your hands**, want to **earn money sooner**, or have a specific trade in mind, **EUD or EUX** could be excellent.

If you're in between — maybe you want a mix — **EUX** is a great hybrid.

Would you like help choosing between these based on your interests? If you tell me what subjects or jobs interest you, I can recommend a more specific path.
