

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Romania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking seriously about your future at 16. Since you're in Denmark and have just completed primary school (9th or 10th grade depending on your specific path), you're now at the point where you choose your *youth education* (ungdomsuddannelse). Here's a breakdown of your main options and recommendations based on different goals:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are ideal if you're considering going to university or want to keep your options open.

Main types:

- **STX (Almen studentereksamen)** – General academic education with focus areas like science, social science, or language.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** – Focus on technology and natural sciences.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year academic program (more common if you're older or prefer a quicker path to university).

✓ Good if:

- You enjoy academic subjects.
- You're considering university (e.g. doctor, engineer, lawyer, etc.).
- You want flexibility and time to decide your career.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship (praktik). You'll graduate with a qualification that lets you work in a trade or technical job.

Examples:

- Carpenter, Electrician, Hairdresser, Mechanic, IT Technician, Healthcare assistant, etc.

✓ Good if:

- You like hands-on work.
- You want to earn money sooner.
- You're motivated by practical learning rather than academic.

🟡 *Tip:* Some EUD programs now have the **EUX option**, which combines vocational training with academic subjects so you can later apply to university.

So... What Should You Choose?

It depends on your **interests, learning style, and future goals**. Here are a few guiding questions:

1. Do you enjoy academic learning (reading, writing, theory)?

- Yes → Consider **STX**, **HTX**, **HHX**, or **HF**.

2. Do you prefer doing things with your hands and learning by doing?

- Yes → Look into **EUD** or **EUX**.

3. Not sure yet?

- **STX** or **HF** gives you more time and flexibility to decide later.

My General Recommendation

Since you're fluent in Danish, were raised in Denmark, and are still exploring, I'd recommend:

➤ **STX or HTX:**

- STX if you want a broad education (especially strong if you're interested in languages, social sciences, or humanities).
- HTX if you're curious about science, tech, or engineering and like structured learning.

They keep all doors open and give you time to mature, think about careers, and possibly explore your Romanian-Danish identity in a global context (e.g. through languages or international studies).

Final Advice:

- **Visit open house events (infoaftener)** at different schools.
- Talk to a **UU-vejleder** (educational counselor) – they're free and very helpful in Denmark.
- Don't stress if you're unsure. The Danish system allows flexibility, and many people change paths later.

Would you like me to help you explore specific schools or programs near where you live in Denmark?
