

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Romania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school—congrats! In Denmark, finishing *folkeskolen* typically happens around age 15-16, so you're right on track. Since you're fluent in Danish and have a multicultural background, you have many options. Here's a clear breakdown of the paths you can consider:

♦ Main Educational Paths After Primary School

1. Gymnasiale Uddannelser (Upper Secondary Education – Academic Track)

These are 2–3-year programs that prepare you for university.

- **STX (Studentereksamen)** – Focuses on general education (sciences, humanities, social studies).
- **HHX (Højere Handelseksamen)** – Business-oriented: economics, marketing, international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology and science.
- **HF (Højere Forberedelseksamen)** – Shorter (2 years), more practical, great if you're unsure about your long-term goals.

✓ Good for you if:

- You enjoy academic subjects and might want to go to university later.
- You want flexibility before deciding on a career.

2. Erhvervsuddannelser (VET – Vocational Education & Training)

Combines school and apprenticeship—typically 3–5 years.

Examples:

- Electrician, mechanic, carpenter
- Hairdresser, chef, health worker

✓ Good for you if:

- You want to start working sooner in a skilled trade.
- You prefer hands-on learning over theory.

3. Kombinerede Forløb (EUX)

A mix of both academic and vocational education. You get a vocational qualification *and* the right to apply to university.

✓ Good for you if:

- You want both options open: job or further study.
- You're interested in a specific trade but also want higher education opportunities.

How to Choose?

Here are some questions to ask yourself:

- Do I enjoy school and academic learning?
- Do I prefer hands-on/practical tasks?
- What subjects interest me most?
- Do I think I want to study at university later?
- Am I excited about a specific job or field already?

Extra Tip for You as a Danish-Romanian

Being bilingual and bicultural is a **big advantage**. If you're good at languages, consider careers in:

- International business (HHX)
- Translation/interpretation
- EU/foreign relations
- Tourism & hospitality

You could also explore exchange programs or summer schools in Romania or other EU countries.

My Suggestion

If you're not 100% sure yet, **STX or HF** might be a great way to keep your options open. They'll allow you to explore different subjects before deciding on a more specific direction.

If you already enjoy a specific trade or want to work sooner, **EUX** is a great middle-ground option that gives both practical experience and academic qualifications.

If you'd like, I can help you look at specific schools or programs in your area in Denmark. Just let me know where you live, and I'll find some good options!
