

# Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Rwanda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's awesome that you're thinking ahead about your future. Since you just finished primary school in Denmark (which means you're likely moving into *ungdomsuddannelse* – youth education), you have several good options depending on your interests, strengths, and long-term goals.

**Here's a breakdown of your main paths in Denmark after primary school:**

## 1. Gymnasiale uddannelser (General upper secondary education)

These are aimed at students who want to go to university later.

### Options:

- **STX (Studentereksamen):** Focuses on a broad academic education (humanities, natural sciences, social sciences).
- **HHX (Handelsskolens studentereksamen):** Focus on business, economics, and international trade.
- **HTX (Teknisk studentereksamen):** Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen):** A shorter 2-year program, more practice-oriented, good for those unsure or wanting to work earlier.

### Good for you if:

- You enjoy academic learning.
- You might want to go to university in the future.
- You're still exploring what you want to do long term.

## 2. Erhvervsuddannelser (Vocational education and training – VET)

This combines school and apprenticeship. You get a trade or profession.

### Examples:

- Electrician, carpenter, mechanic
- Hairdresser, chef, social worker assistant
- IT support, media graphics

### Good for you if:

- You prefer hands-on learning.
- You want to start working sooner (but can still continue education later).
- You're motivated by practical tasks and real-world work.

## 3. EUX (Combination of vocational and academic education)

This combines VET with a general upper secondary diploma – so you get both.

### Good for you if:

- You want a profession but also want the option to go to university later.
- You're ambitious and ready to work hard (it's a tough program but very valuable).

### What should *you* consider when choosing?

Ask yourself:

- Do I enjoy academic subjects like languages, math, science, history?
- Do I learn better through reading and writing, or through doing things?
- Do I have an idea of a job I want in the future (doctor, engineer, designer, business owner)?
- Am I interested in university, or would I rather start earning sooner?

## Recommendations based on your background

Since you're fluent in Danish, born and raised in Denmark, and have finished primary school, all options are open to you.

If you're **interested in university and enjoy academic subjects**, start with:

- **STX** (broadest and most flexible)
- or **HTX** (if you love tech, science, and innovation)

If you're **more hands-on or want to explore a trade**, consider:

- **EUX** (if you also want academic options)
- or **Erhvervsuddannelse** (if you're ready to start learning a specific trade)

### Final Tip

Visit [uddannelsesguiden.dk](https://uddannelsesguiden.dk) (UG.dk) and try their quiz “Find din uddannelse” – it’s made to help Danish students like you figure out their path. Also, many schools hold open house events (*Åbent Hus*) – visit and talk to students and teachers.

---

If you tell me more about what interests you (e.g., do you like tech? working with people? business? creative things?), I can give you a much more personal recommendation!
