

Uddannelsesvejledning efter 9. klasse

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Rwanda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps — and congrats on finishing primary school!

In Denmark, after finishing **9th or 10th grade (primary/lower secondary school)**, you typically choose between a few different **youth education paths**, depending on your interests, skills, and future goals. Since you're 16 and just finished primary school, here are the main options to consider:

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are aimed at students who may want to continue to higher education (e.g., university or business school).

- **STX (Alment gymnasium)** – A broad academic program with humanities, sciences, and social studies.
- **HHX (Handelsskolens gymnasium)** – Focuses on business, economics, and marketing.
- **HTX (Teknisk gymnasium)** – Focuses on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** – A shorter (2-year) program, more practical and often for people a bit older or wanting a more direct path to certain professions.

Choose this path if:

- You enjoy school subjects and learning in an academic setting.
- You're considering university or another form of higher education in the future.
- You're not yet sure exactly what job you want, but want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

These programs combine school and apprenticeships in a company. You learn a trade or profession like:

- Electrician
- Carpenter
- Hairdresser
- IT-supporter
- Healthcare assistant
- Mechanic

✓ Choose this path if:

- You prefer practical, hands-on work.
- You want to start earning money and working sooner.
- You already have a clear idea of a trade or profession you want.

Some vocational programs also let you move on to higher education later, especially if you take the **EUX**, which combines vocational training with upper secondary education.

? A Few Questions to Ask Yourself:

- Do I enjoy academic work and studying theory, or do I prefer practical tasks?
- Do I already have a dream job or career in mind?
- Am I open to going to university later?
- What are my strengths (e.g., math, writing, creativity, working with people)?

✨ Recommendation (based on what you've said):

Since you're fluent in Danish, born in Denmark, and just finishing school now, you're in a strong position. Here's a balanced suggestion:

- If you're still **unsure what to choose**, consider **STX** or **HF** — they keep your options open and give you time to decide what interests you most.
- If you're more interested in a specific field like **business** or **IT**, maybe look into **HHX** or **HTX**.
- If you prefer working with your hands or learning on the job, then check out a **VET** program, possibly with an **EUX** if you also want academic flexibility.

💡 Bonus Tip:

It might help to **visit educational fairs**, talk to a **vejleder (educational counselor)** at your school, and explore <https://www.ug.dk/> (a very useful site about Danish education paths).

Let me know what you're most interested in — I can help you narrow it down even more or explore specific careers!
