

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Rwanda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background—you're in a great position to make some important choices about your future, and it's great that you're already thinking about this seriously. In Denmark, after primary school (folkeskole), you typically have a few main educational paths to choose from. Each one can lead to very different futures, depending on your interests, strengths, and career goals. Here's a breakdown to help you decide:

## ♦ 1. Gymnasium (STX, HHX, HTX, HF) – Academic Education

If you're interested in continuing your education and possibly going to university later, this is the usual path.

- **STX (Almen Studentereksamen):** Focuses on general academic subjects—good if you like languages, humanities, science, or social studies.
- **HHX (Handelsskolens Studentereksamen):** Business-focused. Great if you're interested in economics, marketing, or international trade.
- **HTX (Teknisk Studentereksamen):** Focus on science, technology, and innovation. Great for future engineers, IT specialists, or scientists.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more practical. Often used if you want to enter certain professional bachelor programs quickly.

● **Recommended if:** You enjoy studying, want to keep university as an option, and want a broad range of career paths open.

## ♦ 2. EUD (Erhvervsuddannelse) – Vocational Education

A more practical and job-oriented path. You split time between school and working in a company (apprenticeship).

You can specialize in things like:

- Health and care
- IT and technology
- Construction and mechanics
- Design and media

● **Recommended if:** You want to work soon, like hands-on tasks, and prefer practical learning.

### ♦ 3. EUX – Combination of Vocational and Academic

Gives you both a vocational education and a general upper secondary certificate (like gymnasium). A great mix if you're unsure.

● **Recommended if:** You want to keep doors open for both university and getting a job fast.

### ♦ 4. International or Special Programs

Some schools offer international programs (like IB) or have diversity-focused initiatives. As someone with Rwandan roots, you might find mentorship or community opportunities through organizations supporting bicultural youth.

### ♦ Some Questions to Ask Yourself:

- Do I enjoy academic learning or prefer practical work?
- Am I interested in a university degree later?
- What are my strengths—science, creativity, business, working with people?
- Do I want to start earning money soon?

### ♦ Examples Based on Interests:

| Interest           | Suggested Path                        |
|--------------------|---------------------------------------|
| Technology, IT     | HTX, EUX with tech focus, or EUD IT   |
| Business & Finance | HHX or EUX Business                   |
| Helping People     | HF or EUD (health/social care)        |
| Creative Arts      | STX (with arts) or design-focused EUD |
| Mechanics, Crafts  | EUD (craftsman track) or EUX          |

If you tell me what you're passionate about or what subjects you liked in school, I can give a more personalized recommendation.
