

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Kitts and Nevis. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're fluent in Danish and have just completed primary school—congratulations! At 16 in Denmark, you're at a key decision point in the Danish education system. Here's a breakdown of your options and some guidance based on different interests and goals:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – Academic Path)

This is ideal if you think you might want to go to university later.

Main options:

- **STX** (*Almen studentereksamen*) – Broad academic focus (humanities, science, social science). Great if you're still figuring out your interests.
- **HHX** (*Højere handelseksamen*) – Focus on business, economics, and international studies.
- **HTX** (*Højere teknisk eksamen*) – Focus on technology, natural sciences, and innovation.
- **HF** (*Højere forberedelseksamen*) – Shorter (2 years), more practically oriented, often for those who want to pursue specific professions later.

Recommended if:

You enjoy school subjects, want to keep your options open for university, or are interested in careers in fields like law, teaching, engineering, business, science, or medicine.

🔧 2. Erhvervsuddannelser (Vocational Education – Practical Path)

If you want to start working sooner and learn a specific trade, this might be for you.

Examples of programs:

- Electrician
- Carpenter
- Chef
- Hairdresser
- Healthcare assistant
- IT support technician

These usually combine school and paid apprenticeship/work.

Recommended if:

You enjoy hands-on work and want a quicker path to employment or becoming a skilled professional.

 3. Combination Paths / EUX

- **EUX:** Combines vocational training with general upper secondary education (like STX or HHX). Gives you both a trade and the option to go to university.

Recommended if:

You're ambitious and want the flexibility of both practical work and academic study.

 Consider This When Choosing:

- What subjects do you enjoy most?
 - Do you prefer practical or theoretical learning?
 - Do you want to go to university one day?
 - Do you want to work soon and earn money?
 - Are you curious about things like business, healthcare, technology, or creative arts?
-

 Bonus Tip: Use Your Background!

As someone with roots in Saint Kitts and Nevis, you're part of a multicultural generation in Denmark. That can be a strength if you choose paths like:

- International business (via HHX or STX)
 - Healthcare and social work (where cultural understanding matters)
 - Languages or diplomacy (with STX + university)
 - Tourism or hospitality
-

Would you like help narrowing down your options based on your interests or what subjects you liked best in school? I can also help you look at specific programs in your area.
