

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Kitts and Nevis. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! That's a big step. In Denmark, after *folkeskole* (primary and lower secondary school), you have several educational paths to choose from depending on your interests, strengths, and future goals.

Here's a breakdown of your main options:

1. Gymnasiale uddannelser (Upper Secondary Education - Academic Track)

These are for students aiming for university afterward.

Main types:

- **STX** (*Almen studentereksamen*): General high school with a broad range of subjects.
- **HHX** (*Højere Handelseksamen*): Focus on business, economics, and international trade.
- **HTX** (*Højere Teknisk Eksamen*): Emphasizes science and technology.
- **HF** (*Højere Forberedelseseksamen*): 2-year program (often for slightly older students or a more practical approach).

Recommended if: You're interested in academics, want to keep university options open, or are not yet sure about your future career.

2. Erhvervsuddannelser (Vocational Education and Training - VET)

These are hands-on programs that combine school and apprenticeship in real workplaces.

You can become:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- IT-supporter
- Health care assistant
- ...and much more.

Recommended if: You prefer practical learning or want to start working sooner with strong job security.

3. Kombination eller specialskoler

- **EUX:** Combines vocational training and general subjects so you can both work and go to university afterward.
- **Efterskole** (optional, usually 9th or 10th grade): A 1-year boarding school experience that can focus on everything from sports to arts to academics.
- **10. klasse:** One more year to improve grades or maturity before making a big decision.

Recommended if: You need more time to decide or want a unique learning experience with personal development.

How to Choose?

Here are questions to help you reflect:

- Do you enjoy theory and reading, or working with your hands?
- Do you see yourself going to university?
- Are you passionate about a particular subject (like science, tech, business, design)?
- Would you like to start earning money soon?
- Do you want to explore a bit more before choosing?

Example Pathways:

1. If you like academics and want options later:

→ Choose **STX** or **HHX**

2. If you like business or want to work in international settings:

→ **HHX** could be a good fit (especially with your multicultural background!)

3. If you enjoy tech, coding, or machines:

→ Consider **HTX** or a **VET** program in IT or mechanics

4. If you want both hands-on work and university option:

→ Go for **EUX**

If you tell me more about your interests, I can help recommend a specific direction. Would you like to travel in the future? Are you interested in business, healthcare, technology, or creative work?
