

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Vincent and the Grenadines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking seriously about your next steps after finishing primary school. Since you're 16 and in Denmark, you've likely just completed **9th grade**, which is usually the end of **Folkeskole**. That means you now have several solid educational paths to choose from.

Here are your main options, with some tailored advice based on your situation:

1. Gymnasium (STX, HHX, HTX, or HF)

These are general upper secondary education programs, usually lasting 2–3 years and preparing you for university.

- **STX (Alment Gymnasium):** Broadest option with focus on science, humanities, and languages. Ideal if you're unsure what to study later or want to keep university options open.
- **HHX (Handelsskolen):** Focuses on business, economics, and international trade. Good if you're interested in business or finance.
- **HTX (Teknisk Gymnasium):** Strong focus on science, technology, and design. Great for future engineers, programmers, or designers.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more practical and flexible. Often chosen by students who want a more hands-on or alternative route to higher education.

Recommended if:

You enjoy school, want to go to university, or want a wide range of future career options.

2. EUD / EUX (Vocational Education and Training)

Combines school and apprenticeships. Leads directly to skilled jobs like electrician, mechanic, chef, health care assistant, etc.

- **EUD:** More focused on working right after school.
- **EUX:** Combines vocational training with academic subjects—so you can both work and qualify for university later.

Recommended if:

You want to **learn by doing**, get a job sooner, or prefer more practical skills. EUX is a strong hybrid option if you want both work and study opportunities.

3. Special Schools or Programs (e.g., efterskole or international focus)

You could consider:

- **Efterskole** for a year—gives time to explore yourself, build confidence, or focus on a subject like music, sports, or design.
- **IB (International Baccalaureate)** if you're interested in studying abroad or in a more global setting.

Recommended if:

You want to develop personally, explore your identity or culture, or might study abroad in the future.

What you should consider when choosing:

1. **Your interests** – What subjects or activities do you enjoy most?
2. **How you learn best** – Do you like theory (books, lectures) or practice (hands-on work)?
3. **Future goals** – Do you want to go to university, start working, or maybe travel or explore creative paths?
4. **Support and role models** – Talk to your parents, teachers, or mentors for guidance. Your background as someone from a Caribbean heritage could also be a strength in many fields—like languages, global business, or cultural work.

My suggestion:

Since you're fluent in Danish and have finished Folkeskole, and if you're still exploring what you're passionate about, I'd suggest:

Start with STX or HHX, unless you already know you prefer something very practical—then look at **EUX**.

And consider taking a **year at an efterskole**, if you want time to grow personally or creatively.

If you tell me more about your interests (e.g., science, sports, business, art, helping people, etc.), I can give a more specific recommendation.
