

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Vincent and the Grenadines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're in an exciting place in life, and it's great that you're thinking ahead. Since you're 16 and just finished **primary school** in Denmark, it's important to clarify something: in Denmark, **primary and lower secondary school** together are called *folkeskole*, which usually goes until 9th or 10th grade. So I'll base my advice on the assumption that you've finished **9th grade**, which is the normal end point of *folkeskole*. If that's not the case, feel free to clarify.

Your Main Options After Folkeskole in Denmark

You generally have three main types of educational paths:

♦ 1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university.

- **STX (Almen studentereksamen)** – Broad academic education (humanities, sciences, social studies).
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, good if you want to go to university but don't want a 3-year path.

Recommended if you:

- Like theoretical subjects
- Want to keep your options open for university
- Are still figuring out what you want to do long-term

♦ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

More practical education, combining school and apprenticeships.

- You learn a trade or profession like carpenter, chef, mechanic, electrician, hairdresser, social and health care, etc.
- Often very hands-on with real work experience

Recommended if you:

- Like working with your hands or want to get a job more quickly
- Know what trade you're interested in
- Want to earn money while you study

♦ 3. Kombinerede forløb (EUX)

Combines vocational training and general upper secondary education.

- Gives you a trade AND the chance to go to university later
- More demanding but very flexible

Recommended if you:

- Want to become skilled in a trade but also want the option of higher education
- Are ready to work hard

What I Recommend for You

Based on what you've shared (young, fluent in Danish, Danish-born with Caribbean roots, just finished primary/lower secondary school), here's what I'd consider:

✅ If you enjoy academic subjects and might want to go to university:

Go for **STX**, **HHX**, or **HTX** depending on your interests.

- **STX**: If you're interested in a wide range of subjects, including languages, science, and humanities.
- **HHX**: If you're curious about business, global trade, marketing — could be interesting if you want to connect to the Caribbean side of your heritage.
- **HTX**: If you enjoy technology, science, or engineering.

✅ If you're more practical and want to work sooner:

Consider an **EUD** or **EUX** in an area that excites you — for example, if you like helping people, **social- og sundhedsuddannelserne (SOSU)** could be a great path.

Final Advice

- **Visit open house events** at local gymnasiums and vocational schools.
- **Talk to a guidance counselor (UU-vejleder)** in your area — they can help you explore options and even arrange visits or internships.
- Think about what you **enjoy doing**, what kind of **lifestyle** you want, and how much time you're willing to spend in school.

Would you like help choosing between STX/HHX/HTX or exploring what trades are available through EUD? I can give more tailored suggestions if you tell me what subjects or activities you enjoy most.
