

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Vincent and the Grenadines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that helps a lot in giving you a meaningful answer. Since you've just finished primary school in Denmark and are 16, you're at an important decision point. In Denmark, after primary school (folkeskole), students typically choose between several educational paths. Here's a breakdown of your main options and some advice based on your situation:

Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are more academic and prepare you for university.

- **STX (Almen studentereksamen)** – Focuses on humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focuses on technology and natural sciences.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, also university prep.

 **Best for you if:** You enjoy studying, want a university degree, and aren't sure what career yet.

2. EUD / EUX (Erhvervsuddannelser) – Vocational Education

These are more hands-on and prepare you for a trade or craft (plumber, electrician, healthcare worker, chef, etc.).

- **EUD:** Focuses on work and apprenticeship.
- **EUX:** Combines EUD with academic classes so you can also go to university afterward.

 **Best for you if:** You want to start working sooner or enjoy doing things with your hands, but want to keep doors open for further education (then choose EUX).

What to Think About When Choosing

1. What are you naturally good at or interested in?

Are you more into books, tech, people, business, or practical work?

2. Do you want to go to university eventually?

If yes, you'll probably want STX, HHX, HTX, or EUX. If not, EUD might be a faster path to a job.

3. Do you want to earn money soon or prefer studying longer?

Vocational paths get you into paid apprenticeships faster, while gymnasiale uddannelser are longer but lead to higher education.

Recommendation Based on What You Shared

Since you're fluent in Danish, born and raised in Denmark, and just finishing school, you have all the normal options open. Here's a suggestion depending on your interests:

Interest	Suggested Path
You like books, learning	STX or HF
You like business/economy	HHX
You like science or tech	HTX
You like practical work	EUD or EUX
You're unsure	HF or STX (broadest)

If you're **still undecided**, consider starting with an **introductory course (grundforløb)** in EUD/EUX, or visiting open house events at local **gymnasier** to talk to students and teachers.

Want Help Choosing Based on Your Interests?

If you tell me:

- What subjects or activities you enjoy
- If you see yourself studying at university later
- Or if you want to start working sooner

...I can help you narrow it down further.

Let me know what you're leaning toward or curious about!
