

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Samoa. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to start — congratulations on finishing primary school! In Denmark, after completing **folkeskolen (primary and lower secondary school)**, you have several good educational paths to choose from, depending on your interests, strengths, and goals. Here's a breakdown of the main options, along with recommendations based on different directions you might want to go in:

🧠 1. Gymnasiale Uddannelser (Upper Secondary School – Academic Path)

This is the typical next step if you're interested in **going to university later**.

Options:

- **STX (Studentereksamen):** Broad academic focus (sciences, humanities, social sciences).
- **HHX (Higher Commercial Examination):** Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination):** Focus on technology, IT, and science.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical – good if you want more flexibility later.

Recommended if:

- You enjoy studying theory and a variety of subjects.
- You might want to attend university in the future.
- You're still figuring out what you want long term.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – Practical Path)

This is the right path if you prefer **hands-on work** and want to enter the workforce sooner, possibly becoming a skilled tradesperson.

Examples:

- Electrician, carpenter, mechanic, chef, hairdresser, etc.
- Some programs (EUX) **combine vocational training with academic subjects**, so you can still apply to university later.

Recommended if:

- You like working with your hands or want to learn a trade.
 - You want to start working earlier and still keep doors open.
-

My Recommendation (Based on Your Situation):

Since you're still young (16) and probably still exploring your interests, I recommend considering:

➤ **STX or HF if:**

- You're not sure yet what you want.
- You enjoy general education and want to keep all doors open.

➤ **HTX or HHX if:**

- You're interested in technology, business, or entrepreneurship.
- You're curious about how things work or want to build things.

➤ **EUX if:**

- You're drawn to doing something practical but still want to keep academic options open.
-

Bonus Consideration:

With your Samoan background, you might have **bilingual or intercultural strengths**. That could open doors in:

- **Language-based careers** (teaching, translation, international relations).
 - **Cultural exchange, diplomacy, or NGOs.**
 - **Tourism or international business.**
-

Next Steps:

1. **Visit an educational counselor (uddannelsesvejleder)** – your local *UU-vejledning* office can help.
 2. **Visit open house events (åbent hus)** at local schools to get a feel for the environment.
 3. **Think about your interests:** Do you like science? Helping people? Building things?
-

Would you like help narrowing it down based on your specific interests, hobbies, or career dreams? Let me know what you enjoy doing, and I can help guide you further.
