

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sao Tome and Principe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it gives a really good picture of where you are right now. Since you've just finished **primary school in Denmark** and you're 16, you're likely at the point where you're deciding between the different **youth education paths** Denmark offers after **9th or 10th grade**. Here's a breakdown of your main options and some guidance based on your age, language fluency, and background:

## 🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're interested in **academics** and possibly going to university later, this is probably your best route.

### Options:

- **STX (Almen studentereksamen):** Focuses on humanities, social sciences, and natural sciences. Good all-round choice.
- **HHX (Handelsskole):** Focuses on business, economics, and marketing.
- **HTX (Teknisk gymnasium):** Focuses on science, technology, and design.
- **HF (Højere forberedelseseksamen):** A shorter 2-year program, good if you're a bit older or want a more practical academic route.

### Recommended if:

- You enjoy academic subjects like math, science, languages, or social studies.
- You're open to university later.
- You want flexibility and don't mind classroom-focused learning.

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you prefer more **hands-on work**, want to get a job quickly, or learn a trade, this is a great path. You can become everything from an electrician to a chef to a hairdresser.

### Recommended if:

- You want to work soon after finishing your studies.
- You like practical work over theory.
- You're interested in a specific trade or profession.

You can even **combine EUD with EUX**, which gives you both a vocational education and the option to go to university afterward.

### 🧡 3. Alternative or Bridge Programs

If you feel unsure or need a bit more time to decide, there are **introductory courses or production schools** (produktionsskoler/FGU), where you can try different things and build your skills.

### 🇩🇰 Extra Notes for You:

- You're fluent in **Danish**, which is a huge advantage — you'll have full access to all education paths.
- Being from an immigrant background (São Tomé and Príncipe), it can be empowering to consider careers where **representation matters**, such as **teaching, healthcare, public service**, or **entrepreneurship**.
- If you're interested in **Africa-related studies, languages**, or **international relations**, STX or HHX might lead you toward that direction later.

### ? Some Questions to Ask Yourself:

- Do I enjoy schoolwork, or do I prefer hands-on tasks?
- Do I want to go to university one day?
- Are there careers I'm already curious about?
- Would I enjoy starting work earlier, or do I want to study longer?

### ✅ My Suggestion:

Since you're 16, fluent in Danish, and have just finished primary school, I'd recommend:

- **Go to 10th grade** if you feel unsure or want to improve grades/maturity.
- Otherwise, consider **STX or HHX** if you're curious about academics, especially with a long-term goal (university or specific career).
- Or **EUD/EUX** if you like hands-on skills or a specific trade.

If you'd like, I can help you explore specific programs or schools near where you live in Denmark. Just tell me your city or what subjects or jobs you're curious about!
