

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saudi Arabia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16, living in Denmark, and have just completed **Folkeskole (primary and lower secondary school)**, you're now at an important crossroad in the Danish education system. Your next step depends a bit on your interests, goals, and whether you're leaning toward university, vocational training, or something else. Here's a breakdown of your main options, with recommendations tailored to your situation:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're aiming for **university later**, this is the most direct route.

Options:

- **STX (Studentereksamen)** – Broad academic education with humanities, sciences, and languages.
- **HHX (Higher Commercial Examination)** – Focuses on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – Emphasizes science, technology, and engineering.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more practical, good for adults or those wanting a shorter route to certain university programs.

Recommended if:

- You enjoy studying academically.
- You're not sure yet what you want but want to keep your options open.
- You're thinking of university (medicine, law, engineering, teaching, etc.).

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and paid apprenticeships and lead directly to jobs.

Fields include:

- Health and social care
- IT and technology
- Mechanics and engineering
- Culinary and hospitality

- Construction

Recommended if:

- You prefer hands-on learning.
- You want to work soon and maybe start earning money earlier.
- You're interested in a practical profession (electrician, chef, mechanic, healthcare assistant, etc.).

 You can also combine EUD with a **gymnasial exam** through **EUX**, which gives both a vocational qualification **and** university entrance rights.

Other factors to consider:

- **Language skills:** Being fluent in Danish is great. If you also speak Arabic or English well, that can give you an edge in global or multicultural fields like international business, diplomacy, or translation.
- **Cultural background:** Your heritage can be a strength. Consider fields like intercultural communication, social work, or even international law if you're interested in connecting both worlds.

What to do next:

1. **Talk to your UU-vejleder (youth guidance counselor)** – They can give you personalized advice and help you apply.
2. **Visit education fairs or open houses (åbent hus)** at local schools.
3. **Try short internships (praktik)** if you're considering vocational training.

My recommendation (based on your profile):

If you're still figuring out your long-term goals, I'd suggest:

- **STX** if you like academic subjects and want the broadest options later.
- **EUX** if you're more practical but want to keep the door to university open.

Either way, Denmark's system is flexible. You can change paths later without starting completely over. Want help comparing STX vs HHX or looking into a specific career? I can help with that too.
