

Uddannelsesvejledning for ung dansker

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Senegal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — you're in an exciting phase where many doors are opening. Since you've just finished primary school in Denmark (which usually means you've completed **9th or 10th grade**, depending), your next steps will likely be in the **upper secondary education** system.

Here are the main paths available in Denmark after primary school, with recommendations tailored to you:

🎓 1. General Upper Secondary Education

These programs are more academic and prepare you for university.

STX (Studentereksamen) – General Upper Secondary School

- **Focus:** Broad subjects — Danish, sciences, humanities, social sciences.
- **Length:** 3 years.
- **Good for you if:** You enjoy school subjects like languages, history, or science and might want to go to university.
- **Future paths:** University, college, or higher professional education.

HHX (Higher Commercial Examination)

- **Focus:** Business, economics, marketing, and foreign languages.
- **Length:** 3 years.
- **Good for you if:** You're interested in international business or finance — especially useful with your multicultural background.
- **Future paths:** University, business school, or starting your own company.

HTX (Higher Technical Examination)

- **Focus:** Technology, science, and IT.
- **Length:** 3 years.
- **Good for you if:** You enjoy science, tech, or engineering.
- **Future paths:** Technical university programs (e.g. DTU), IT jobs.

2. Vocational Education and Training (EUD)

- **Focus:** Learning a trade or profession (e.g., electrician, carpenter, hairdresser, social care).
 - **Length:** 2-5 years, includes both school and apprenticeship.
 - **Good for you if:** You want to start working earlier, like hands-on learning, or want a skilled job.
 - **Future paths:** Direct employment or further education (e.g. **EUX**).
-

3. EUX – Combination of Vocational & Academic

- **Focus:** A mix of vocational training + academic courses.
 - **Length:** ~4 years.
 - **Good for you if:** You want a trade but also keep the option open for university.
 - **Future paths:** Skilled job *and* university access.
-

Personal Considerations

As someone with Senegalese roots and fluent in Danish, you might consider:

- **HHX** if you're interested in international business, language, or entrepreneurship — you could use both your Danish and African cultural background in global trade or development.
 - **STX** if you're open to many fields and want a solid academic foundation.
 - **EUX** if you want practical experience with academic flexibility.
-

My recommendation

If you're not sure exactly what you want yet but you're a solid student:

- **STX or HHX** give you the broadest future options.
 - If you're more practical or want to start earning sooner, **EUX** is a powerful hybrid path.
-

If you tell me more about:

- What subjects you enjoy,
- Whether you prefer hands-on or academic learning,
- Any career interests you already have (even vague ones),

... I can give you a much more specific recommendation.
