

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Serbia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be—standing at the start of your next chapter with many possibilities ahead! Since you've just finished primary school in Denmark (which ends after 9th or 10th grade), your next step typically falls within **youth education (ungdomsuddannelse)**. There are a few main paths you can consider depending on your interests, strengths, and future goals:

1. Gymnasiale uddannelser (General Upper Secondary Education)

If you enjoy academic subjects and might want to go to university later.

- **STX (Alment Gymnasium)** – Broad and academic, good if you're unsure what to specialize in yet. Offers a wide range of subjects (e.g. science, languages, social studies).
- **HHX (Handelsskolen)** – Focus on business, economics, and international studies. Great if you're interested in commerce or entrepreneurship.
- **HTX (Teknisk Gymnasium)** – Focus on science, technology, and innovation. Ideal for future engineers or tech lovers.
- **HF (Højere Forberedelseksamen)** – Shorter (2-year) and more practical/academic mix. Good if you prefer a more mature and less theory-heavy path.

 Recommended if:

You like school, want more general knowledge, and might want to study at university later.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you like doing hands-on work and want to get a job or a skilled trade quickly.

- Become an **electrician, carpenter, chef, social worker, healthcare assistant**, etc.
- Combines school and **paid apprenticeships**.
- You can still go on to further education later with **EUX** (a combination of EUD + gymnasium-level classes).

 Recommended if:

You prefer practical learning, want to work with your hands, or get a job earlier.

3. EUX – Combination of vocational and academic

- A mix of vocational training and gymnasial level education.
- Takes longer but gives both a trade **and** a diploma that allows university admission.

👉 Recommended if:

You want a trade but still want to keep university doors open.

Questions to help you decide:

- Do you enjoy academic subjects or prefer more practical, hands-on work?
 - Do you think you might want to go to university later?
 - Are there particular careers or industries you're already curious about (e.g., tech, business, design, healthcare)?
 - Would you rather get into the workforce earlier, or keep studying for a bit longer?
-

Extra tips just for you:

- Since you're fluent in Danish and come from a bilingual home, you may have an advantage in **language studies, international business, or public service.**
 - Consider talking to a **UU-vejleder (Youth Education Guidance Counselor)** – they can help you explore your options based on your strengths and interests.
 - Don't stress about having your whole life figured out now. You can change paths later!
-

If you tell me a bit more about what subjects you like, hobbies, or what you might want to do in the future, I can give a more personal recommendation.
