

Uddannelsesvejledning for ung dansker

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot. Since you're 16 and just finished *folkeskole* (primary/lower secondary school) in Denmark, you're now at a typical point for choosing between different youth education paths. The best path depends on your interests, strengths, and long-term goals (like career ambitions or areas of study you enjoy). Here's a breakdown of the main options and some guidance:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are great if you're considering university later on.

- **STX (Almen studentereksamen)**
 - Broadest academically – includes humanities, science, and social science.
 - Good if you're still exploring interests or want to keep many doors open.
 - **HHX (Højere handelseksamen)**
 - Focuses on business, economics, marketing.
 - Great if you're into entrepreneurship or finance.
 - **HTX (Højere teknisk eksamen)**
 - Focuses on science, technology, and engineering.
 - Ideal if you like math, physics, IT, or tech.
 - **HF (Højere forberedelseksamen)**
 - Shorter (2 years), more practical.
 - Good if you want a quicker route to certain professions or are unsure about a full 3-year program.
- ♦ **Recommended** if you want to go to university or you're academically inclined.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These prepare you for a job right away but also allow further education later (e.g., *EUX*).

- **EUD**
 - Learn a trade: carpentry, plumbing, hairdressing, chef, electrician, etc.
 - Combines school and apprenticeship.

- **EUX**

- A mix of vocational training and academic subjects.
- You can get a trade qualification *and* qualify for university.
- ♦ **Recommended if** you want practical experience, earn money while studying, or have a specific trade/job in mind.

A Personal Recommendation:

Since you're fluent in Danish, grew up in a bilingual/multicultural home, and just finished folkeskole, I'd recommend asking yourself:

- Do I enjoy school and studying academic subjects?
- Do I have a specific career or field in mind (like business, IT, health, design)?
- Do I want to go to university someday, or start working sooner?

Examples:

- **You love science or tech?** → HTX
- **You're good with people and want a solid career fast?** → EUX or EUD in healthcare, business, or service.
- **You enjoy languages, history, social sciences?** → STX
- **You want to be an entrepreneur or work in marketing?** → HHX
- **You're unsure and want a shorter academic route?** → HF

Next Steps:

- Visit **UddannelsesGuiden.dk** (the official Danish education guide).
- Talk to an educational counselor (*UU-vejleder*) — they're there for this exact purpose.
- Try visiting a few schools during their open house events (*åbent hus*).

If you tell me more about your interests (e.g., favorite subjects, hobbies, or dream job), I can help you narrow it down even more.
