

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Somalia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! At 16 and having finished primary school in Denmark, you're at an important decision point. In Denmark, the typical paths after **folkeskole (primary and lower secondary school)** are:

Main Educational Paths After 9th or 10th Grade in Denmark:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're interested in further academic study, especially university later, one of these might suit you:

- **STX (Studentereksamen)** – Broad academic subjects (sciences, humanities, languages, social sciences).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – Emphasis on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible – good if you're unsure or want to study certain fields quickly.

→ **Best for you if:** You enjoy studying academic subjects, want to keep doors open for university, or want to specialize in business, science, or humanities.

2. EUD/EGU (Erhvervsuddannelse – Vocational Education and Training)

If you want a more hands-on, practical path that leads directly to a job (or later more education):

- Examples: Electrician, mechanic, carpenter, hairdresser, social and health worker, etc.
- Often includes **apprenticeship (læreplads)** in a real workplace.
- EUX is a hybrid: vocational + academic, allowing you to work **and** qualify for university.

→ **Best for you if:** You like working with your hands, want a job sooner, or are not that into traditional school.

Your Situation – My Suggestion:

Since you're fluent in Danish, born and raised in Denmark, and now finishing primary school, here's how I'd advise:

✅ Step 1: Reflect on What You Enjoy

- Are you more **theoretical/academic** (e.g. reading, writing, analyzing)?
- Or more **practical/hands-on** (e.g. building, fixing, doing)?
- Do you want to go to **university later**, or would you prefer to start a career earlier?

✅ Step 2: Try a Guidance Counselor (UU-vejleder)

In Denmark, every kommune has a **UU-vejledning** (Ungdommens Uddannelsesvejledning) – free guidance for students like you. They can help match your interests with the right education.

✨ Recommendation (General):

If you're unsure but want to **keep your options open**, I suggest:

STX or HF if you enjoy learning and want a flexible academic path.

EUX if you want practical skills AND the option for university.

HHX or HTX if you know you like business or tech/science.

💬 Want to Tell Me More?

If you tell me:

- What subjects you liked most in school
- Whether you prefer school or more action-oriented work
- Your dream job (if you have one)

I can give a more personal recommendation.
