

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school – congratulations! Since you're 16 and living in Denmark, you're at an important transition point in your education. Denmark has several solid pathways for young people after primary school (folkeskolen). Your choice depends on your interests, strengths, and long-term goals. Here's a breakdown to help you decide:

♦ 1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university.

👉 Options:

- **STX (Alment gymnasium)** – General upper secondary school. Broad subjects (languages, sciences, humanities).
- **HTX (Teknisk gymnasium)** – Focus on technical and science subjects. Good for STEM careers.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and languages.
- **HF (Højere Forberedelseksamen)** – 2-year program, good if you prefer a shorter, more mature environment (often older students).

✅ **Choose if:** You want to go to university or aren't yet sure and want to keep doors open.

♦ 2. Erhvervsuddannelse (VET – Vocational Education & Training)

This is more practical and leads to a skilled trade or job.

👤 Examples:

- Electrician
- Carpenter
- Hairdresser
- Social and Health Care Assistant (SOSU)
- IT technician

You usually combine school time with real work through apprenticeships.

✅ **Choose if:** You like hands-on work, want to start earning sooner, or have a clear career in mind.

♦ 3. Kombineret forløb / EUX

A combination of gymnasium and vocational training. You get both a studentereksamen **and** a trade qualification.

✔ **Choose if:** You want the option to go to university *and* have a trade to fall back on.

♦ What to Think About When Choosing

- **Do you like academic work?** If yes → consider **STX, HTX, HHX**.
 - **Do you want to work with your hands or be active?** If yes → look at **VET** or **EUX**.
 - **Do you have a career goal already (like doctor, engineer, mechanic, social worker, etc.)?**
 - **How much time do you want to study?** University takes longer; vocational tracks are shorter and more direct.
-

♦ As someone with a South Sudanese background

You might also think about how your identity and community can influence your path:

- Want to help people or give back? Healthcare or social work might be a good fit.
 - Interested in representation or leadership? Consider political science, law, or teaching.
 - Are you into tech or engineering? HTX or EUX with a tech focus can be a great launchpad.
-

♦ Final Tip

Talk to a **UU-vejleder (youth guidance counselor)** at your school or local kommune. They can help match your strengths and interests to a path and guide you through applications.

If you want, you can tell me what subjects you like, or what you dream of doing in the future, and I can give you more personal advice.
