

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (likely **9th or 10th grade**, depending on the specific path), you're now at a key decision point in the Danish education system.

Here are your main options:

1. Gymnasiale uddannelser (Upper Secondary Education)

This is the most common academic path if you're aiming for university later. It usually lasts **3 years**.

Types:

- **STX (Almen studentereksamen)** – Focus on general education (languages, science, humanities). Very broad.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – 2-year program, often more practical and suited for people who prefer a shorter, more focused path.

 **Recommended if:**

You enjoy academic work and might want to go to **university** (e.g., in Denmark or Spain in the future).

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This path combines school and **apprenticeship** in a workplace. It usually lasts **2-5 years**, depending on the program.

Examples:

- Electrician, mechanic, carpenter
- Hairdresser, chef, social worker
- IT-support, media graphics, etc.

→ **Recommended if:**

You like learning by doing, want to **enter the job market faster**, or learn a specific **trade or skill**.

3. EUX (Hybrid of vocational and academic)

A mix of EUD and gymnasium. You get both a **vocational qualification** and a **study qualification**, which allows you to go to university as well.

→ **Recommended if:**

You want a **profession** but also want to **keep university as an option**.

Extra advantage you have:

Since your parents are from Spain and you're fluent in Danish, you likely have **bilingual potential**. That can open doors in:

- **International business or diplomacy**
 - **Language teaching or translation**
 - **Working abroad later**
-

My suggestion:

If you're still exploring your interests and you're open to higher education, I'd recommend:

→ **STX or HHX:**

- STX if you're not yet sure what subject you love most – it keeps the most doors open.
- HHX if you're interested in business, economics, or maybe working internationally.

But if you're more **hands-on**, tech-savvy, or creative, then **HTX** or **EUX** could be great fits too.

Would you like help deciding based on your **interests or career dreams**? I can help match that with the best path.
