

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—that's helpful. Since you're 16, have just finished primary school (*folkeskole*), and you're fluent in Danish, you now face a key choice in the Danish education system. Here's a clear breakdown of your main options, along with recommendations depending on your interests and goals.

Main Educational Paths After Folkeskole

In Denmark, you typically choose between:

1. General Upper Secondary Education

- **STX (Studentereksamen):** General academic track. Good if you're interested in university later.
- **HHX:** Focuses on business and economics. Ideal if you're into marketing, international trade, or finance.
- **HTX:** Focuses on science and technology. Great if you like engineering, IT, or science.
- **HF:** A 2-year program, more flexible and often for older students or those who want a shorter academic path.

✅ **Recommended if:** You enjoy academic subjects and might want to go to university (e.g. to become a doctor, teacher, lawyer, engineer, etc.)

2. Vocational Education and Training (EUD/Erhvervsuddannelse)

- Combines school and apprenticeship (praktik).
- You train for specific jobs like electrician, carpenter, chef, hairdresser, social and health care assistant (SOSU), etc.

✅ **Recommended if:** You want to get a job quickly, like hands-on work, and prefer practical learning over academic studies.

What to Think About When Choosing

Here are a few questions that can help you decide:

- Do you enjoy studying subjects like math, science, or languages?
- Do you like working with your hands, solving practical problems, or helping people?

- Are you more interested in getting a job quickly, or studying more years to have a wider choice of careers?
 - Do you have a dream job or career in mind?
-

Personal Recommendation for You

Based on what you've told me:

- You're bilingual (Danish and probably Arabic or another Sudanese language), which is a big advantage.
 - If you enjoy school and are open to more academic learning, **STX or HHX** could be very good choices. They open many doors.
 - If you prefer a more hands-on approach or want to start earning sooner, **a vocational education (EUD)** could be a great fit. For example:
 - Social and Health Care Assistant (SOSU) if you're interested in helping people.
 - IT-supporter, electrician, or media graphics if you're tech/creatively inclined.
-

Final Tips

- **Visit education fairs** or your local *ungdomsvejleder* (youth guidance counselor).
 - **Ask for internships (praktik)** in fields you're curious about.
 - **Talk to friends or family** in different paths to hear real experiences.
 - It's okay to **change direction later**—Denmark's system allows for flexibility.
-

If you tell me more about what you like doing, what subjects you're good at, or if you have any dreams for your future, I can give you a more specific recommendation. Would you like to share more about that?
