

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that gives a helpful picture. Since you've just finished primary school in Denmark (called *Folkeskole*), you're at a key decision point in the Danish education system. Let's walk through the main options, and I'll tailor some recommendations based on your background and potential goals.

🎓 Main Educational Paths in Denmark After 9th or 10th Grade

1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

- **STX (Studentereksamen):** General upper secondary education with a broad mix of subjects.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and marketing.
- **HTX (Higher Technical Examination):** Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination):** Shorter (2-year) option, more flexible.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

- For hands-on careers (electrician, carpenter, hairdresser, health care worker, etc.)
- Often includes *EUX*, which gives both a vocational qualification and the right to apply to university.

3. 10th Grade

- Optional, but helpful if you need more time to decide or improve your grades before moving on.

💡 Recommendations (Based on What You've Shared)

Since you're:

- Born and raised in Denmark,
- Fluent in Danish,
- Finished *Folkeskole* (probably 9th grade),

Your options are wide open. Here are some questions and suggestions to help you decide:

1. Do you enjoy academic subjects and maybe want to go to university later?

- **✓ Go for STX, HHX, or HTX** — depending on your interests.

- **STX** is great if you want to keep your options open (e.g., languages, science, humanities).
- **HTX** is great if you love tech, science, or engineering.
- **HHX** is great if you're into business, marketing, or economics.

2. Are you more hands-on and like learning by doing?

-  **Consider a Vocational Education (EUD)**, with or without EUX.
 - You'll get real work experience and can start earning earlier.
 - EUX lets you go to university later, if you change your mind.

3. Not sure what you want yet?

-  **Take 10th grade** to explore options, grow personally, or improve academically.
 - Many take 10th at an *efterskole* – it's a great way to meet new people and grow more independent.

Special Considerations for Your Background

As someone with Sudanese roots, it might be empowering to:

- Bring a unique perspective to education (e.g., in social science or global studies).
- Use your bilingual/bicultural experience in jobs like teaching, healthcare, or public service.
- Seek mentorship or support programs for minority youth in Denmark (there are many great ones!).

Final Tip: Think Long-Term

Ask yourself:

- Do I want to go to university?
- Do I want to start working earlier?
- What subjects or activities do I enjoy most?

If you tell me more about what you enjoy (subjects, hobbies, future dreams), I can give you more specific advice!

Would you like help comparing STX vs HTX vs HHX? Or advice on specific schools near you?
