

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Suriname. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking seriously about your future at this stage — that already puts you ahead of the curve. Since you've just finished primary school (which in Denmark typically means **Folkeskole** through 9th or 10th grade), you're now at the stage where you choose your **youth education path** ("ungdomsuddannelse").

There are a few main options in Denmark, and the right one for you depends on your **interests, goals, and learning style**. Here's an overview of the main paths you can take:

1. Gymnasiale uddannelser (General upper secondary education)

These are academically oriented and typically prepare you for **university**. Great if you're interested in continuing your education.

- **STX (Alment Gymnasium)** – Broad and academic; good if you like humanities, sciences, or social studies.
- **HHX (Handelsskolen)** – Focuses on business, economics, and international trade.
- **HTX (Teknisk Gymnasium)** – Focuses on natural sciences, technology, and innovation.
- **HF (Højere Forberedelseseksamen)** – A shorter, more practice-oriented version (2 years); good if you want a faster route to higher education.

Recommended if:

- You enjoy school and want to go to university or higher education later.
- You're unsure what you want to do but want to keep your options open.

2. Erhvervsuddannelser (EUD) – Vocational education and training

This combines school and apprenticeship/work experience and prepares you for a skilled trade (e.g., electrician, hairdresser, carpenter, chef, etc.).

Recommended if:

- You like practical, hands-on work.
- You want to get a job quickly and don't necessarily want to go to university.
- You're motivated by working and earning while learning.

You can also combine vocational education with the possibility of later university access through **EUX**, which gives you both a vocational and academic qualification.

How to choose?

Ask yourself:

- Do I enjoy schoolwork, reading, and writing?
- Am I more motivated by practical, hands-on activities?
- Do I have a clear idea of what job or field I want?
- Do I want to go to university in the future?

If you're unsure, **STX** or **HF** are often the most flexible choices and keep the door open to future studies.

Personal Suggestions (based on your background):

- Since you're fluent in Danish and likely have strong cross-cultural skills from your Surinamese heritage, you might be well-suited for **HHX** (business and international focus), especially if you're interested in business, languages, or global topics.
 - If you're curious about technology or science, **HTX** could be a great fit — especially with the tech industry growing in Denmark and Europe.
 - If you're unsure, **STX** gives you a broad foundation and time to figure things out.
-

Next Steps

1. **Visit your local "UU-vejledning" (Youth Guidance Center)** – They can help you explore schools, programs, and even arrange school visits.
 2. **Visit the schools you're interested in** – Many offer "brobygning" (introductory courses) or open house events.
 3. **Talk to your teachers or a school counselor** – They know your academic strengths.
 4. **Involve your parents** – Even though you're the one choosing, having their support matters.
-

If you'd like, I can help you make a **comparison chart** of the different options or even help you narrow it down based on what you're interested in. Just tell me more about what you enjoy doing or what careers you're curious about.
