

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Suriname. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot in giving a good answer. Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're at a key point in your education. The Danish system offers several paths after **folkeskole** (primary and lower secondary education), depending on your interests, strengths, and future goals. Here's a breakdown of your main options, plus recommendations depending on your personality and ambitions:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are the general academic upper secondary programs. They prepare you for university.

- **STX (Almen studentereksamen):**
 - Focus: Broad academic subjects like languages, science, humanities.
 - Good if: You're not sure what you want yet or enjoy a mix of subjects.
- **HHX (Højere handelseksamen):**
 - Focus: Business, economics, marketing.
 - Good if: You're interested in entrepreneurship, business, or finance.
- **HTX (Højere teknisk eksamen):**
 - Focus: Technology, natural sciences, and IT.
 - Good if: You enjoy science, engineering, or computer-related subjects.
- **HF (Højere forberedelseksamen):**
 - Shorter (2 years), more flexible.
 - Good if: You want a shorter route to higher education or didn't get the best grades.

● **Recommendation:** If you enjoy academic subjects and are open to university in the future, **STX or HHX** could be great. HHX could be especially interesting if you want to connect your Surinamese background with international business ideas.

🔧 2. Erhvervsuddannelser (Vocational Education & Training - VET)

Also called **EUD**. These programs prepare you for specific jobs, combining school and apprenticeships.

- Focus: Trades (electrician, carpenter), health (nurse assistant), hospitality, IT, and more.
- Takes 2–5 years depending on the path.

- Often paid during apprenticeships.

● **Recommendation:** If you're more practical, want to earn while you learn, and prefer hands-on work, this could be a very solid path. You can even go on to higher education from some VET tracks.

3. Kombinerede veje (EUX)

This is a combination of VET and gymnasial education — you get both a vocational qualification and the right to go to university.

● **Recommendation:** If you like the idea of keeping your options open and working with your hands *and* your brain, **EUX** is a strong choice.

How to Choose?

Ask yourself:

- Do I want to go to university? → Choose **STX**, **HHX**, or **HTX**
- Do I prefer practical, real-world learning? → Choose **EUD** or **EUX**
- Am I interested in business, IT, science, or creativity?
- Do I want to start working sooner, or study longer?

Your Background & Future Possibilities

Since your family is from Suriname, you could consider how your unique background can be a strength — especially in areas like:

- **International business** (HHX)
- **Global studies / cultural studies** (STX)
- **Language and translation** (STX or HF)
- **Entrepreneurship** (EUX business tracks)
- **Healthcare or social work** (HF or VET)

Final Thought:

Most importantly, **pick something that interests you and keeps your options open**. You're young — you don't need to have everything figured out right now. In Denmark, you can change direction later if needed.

If you want, tell me what your favorite subjects are or what kind of job you'd like to have in the future — then I can give you a more specific recommendation.
