

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sweden. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking carefully about your next steps. Since you've just finished primary school in Denmark and you're 16, you're likely at the stage where you can choose between a few main educational paths in the Danish system. Here are your main options, with a bit of guidance depending on your interests and goals:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education - General)

These are good if you plan to go to university later.

Options:

- **STX (Studentereksamen)** – Broad academic focus: humanities, sciences, and social sciences.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination Programme)** – Focus on science, tech, and IT.
- **HF (Higher Preparatory Examination)** – A 2-year option, often more flexible and practical.

✅ Best if:

You enjoy academic subjects and think you might want to attend university later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

A combination of school and apprenticeship (praktik), preparing you directly for a job.

Examples:

- Electrician
- Carpenter
- Healthcare assistant
- Chef
- Mechanic

✅ Best if:

You prefer hands-on work and want to get a job faster or aren't sure about going to university.

3. EUX (Combined Academic + Vocational)

This combines vocational training **with** the academic level of gymnasium, giving you both job skills and a pathway to university.

Best if:

You want a trade **but** also want to keep the door open for university.

Things to Consider:

- **What do you enjoy?** Subjects, hobbies, work styles?
 - **Do you like school?** Or do you prefer practical, hands-on learning?
 - **Would you want to work in Sweden or Denmark in the future?** Both education systems recognize each other's qualifications, but language and focus might influence your choice.
 - **Would you consider an international path?** You could explore the **International Baccalaureate (IB)** if you're interested in studying abroad later.
-

Bonus: With Swedish Parents

If you're fluent or semi-fluent in Swedish, you might look at:

- Swedish upper secondary school (**gymnasieskola**) if you're open to crossing the border.
 - Using your dual-cultural background for work/study in both countries later.
-

What I Recommend:

If you're not sure yet, here's a good **safe path**:

Start with STX or HHX – these are broad, respected, and keep your options open.

If you know you enjoy working practically, then:

EUX is a fantastic hybrid that doesn't close any doors.

If you'd like, I can help you explore specific schools or programmes near you, or make a short list of options based on your interests (e.g., tech, arts, healthcare, etc.). Just tell me a bit more about what you enjoy!
