

# Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Switzerland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've completed primary school – congrats! Since you're 16, fluent in Danish, and living in Denmark, you have a few main educational paths ahead of you. The right one depends on your interests, goals, and how you like to learn. Here's a breakdown of your main options:

## ♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university. There are several types:

### STX (Almen studentereksamen)

- Focus: Broad academic education (languages, science, humanities).
- Good if: You enjoy general subjects and might want to go to university.
- Duration: 3 years.

### HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing.
- Good if: You're interested in business, trade, or finance.
- Duration: 3 years.

### HTX (Higher Technical Examination)

- Focus: Technology, natural sciences.
- Good if: You like science, engineering, or IT.
- Duration: 3 years.

### HF (Higher Preparatory Examination)

- Focus: Shorter, slightly more flexible.
- Good if: You want to go to university but not do a full 3-year program.
- Duration: 2 years.

## ♦ 2. Erhvervsuddannelser (Vocational Education and Training / VET)

- Combines school and apprenticeship (praktik).
- Good if: You prefer hands-on learning and want to get a job directly after.
- Careers: Electrician, carpenter, hairdresser, chef, etc.
- Duration: 2-5 years (depending on the program).

### ◆ 3. EUX (Vocational + Academic Hybrid)

- A mix of vocational training and academic subjects.
- Good if: You want a practical profession **and** keep the door open for university.
- Duration: About 4 years.

### ◆ 4. International Option

Since your parents are Swiss, maybe you're also thinking about Switzerland or international education.

- You could look into **International Baccalaureate (IB)** programs in Denmark.
- Some students also go abroad (to Switzerland, for example) to study or do internships.
- Knowing German, French, or Italian (official languages in Switzerland) could help.

### ✨ My Recommendation (Based on What You've Shared)

If you're unsure of your long-term path but want to keep many doors open:

✅ **STX or EUX** might be your best options.

- **STX** gives a strong academic foundation and time to figure out your interests.
- **EUX** lets you gain practical skills and still qualify for university later.

If you already know you prefer practical, hands-on work and aren't as interested in academic theory:

✅ **VET (Erhvervsuddannelse)** could be a great fit.

Would you like to tell me more about your interests? For example:

- Do you prefer hands-on or academic work?
- Any career dreams (even just vague ones)?
- Do you see yourself living in Denmark or Switzerland long-term?

I can give you more specific advice based on that.
