

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Syrian Arab Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—that gives a great starting point to help you plan your next steps. Since you're 16 and just finished primary school in Denmark (which probably means *folkeskole* up to 9th or 10th grade), you're at an important turning point. Here are some educational paths you might consider, depending on your interests and goals:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university. Good if you're interested in science, languages, humanities, or social studies.

Options:

- **STX** (Almen studentereksamen): Broad academic education, more theoretical.
- **HHX** (Højere Handelseksamen): Focus on business, economics, and marketing.
- **HTX** (Højere Teknisk Eksamen): Focus on technology, science, and IT.
- **HF** (Højere Forberedelseksamen): Shorter (2 years), good if you're not sure yet or want a faster route.

 **Recommended if:** You enjoy school, want to go to university later, and like subjects like science, languages, economics, etc.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Hands-on programs that lead directly to jobs (or you can continue to university later if you take the right electives).

Example fields:

- Electrician, mechanic, carpenter
- Health care (e.g., social and health assistant)
- IT and media
- Chef, baker, or hairdresser

🟢 **Recommended if:** You prefer practical work, want to learn a trade, or would rather work sooner than study for many years.

👉 3. EUX – The Best of Both Worlds

This combines a vocational education *and* a studentereksamen (like STX). It's more demanding but gives you both job skills and a university entrance qualification.

🟢 **Recommended if:** You want to keep university as an option *and* like hands-on learning.

💡 What You Might Consider

If you like:

- **Helping people** → HF + nursing school, or social & health care assistant (SOSU).
 - **Business or law** → HHX or STX with social science.
 - **Engineering, IT, or science** → HTX or STX with science/math focus.
 - **Working with your hands** → EUD or EUX in a field like carpentry, mechanics, or electrician.
 - **University and a wide range of options later** → STX is the most flexible.
-

✅ Tips for Choosing:

1. **Visit open house events** (*Åbent hus*) at schools near you.
 2. **Talk to a guidance counselor (Studievejleder)** at your current school or in your kommune.
 3. **Think about what motivates you** – schoolwork, working with people, making things, solving problems?
-

🌍 Bonus: Your Background

Being fluent in Danish and having a multicultural background (Syrian heritage) is a big strength. You might find value in:

- **Social work**, helping immigrants/integration
 - **Translation/interpreting**, international work
 - **Business or diplomacy**, especially if you're multilingual
 - **Health care**, where cultural understanding is important
-

If you tell me a bit more about your interests or what you're good at (e.g., math, writing, computers, etc.), I can give more personal suggestions.
