

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Syrian Arab Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a really important and exciting point in your life—great that you're thinking ahead. Since you've just finished primary school in Denmark and you're fluent in Danish, you have access to several good education paths. The best choice depends on your interests, strengths, and long-term goals. Here's a simple breakdown of your options and recommendations:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are good if you're aiming for university later:

STX (Studentereksamen)

- **Focus:** Broad subjects: languages, science, history, social studies.
- **Best for:** If you enjoy academic subjects and want a flexible path to university.
- **Duration:** 3 years.

HHX (Higher Commercial Examination)

- **Focus:** Business, economics, marketing, and international trade.
- **Best for:** If you like numbers, business, or want to work in economics or commerce.
- **Duration:** 3 years.

HTX (Higher Technical Examination)

- **Focus:** Science, technology, IT, and engineering.
- **Best for:** If you're into computers, science, or engineering.
- **Duration:** 3 years.

HF (Higher Preparatory Examination)

- **Focus:** Shorter and more practical.
- **Best for:** If you want a faster way to some higher educations, or if you're not ready for a 3-year program.
- **Duration:** 2 years.

2. Vocational Education and Training (EUD/EUX)

These are more hands-on and job-oriented.

EUD (Erhvervsuddannelse)

- **Focus:** Trades and practical jobs like electrician, hairdresser, carpenter, mechanic.
- **Best for:** If you want to work quickly and like learning by doing.
- **Includes:** Both school and internships.
- **Duration:** Varies (usually 3-4 years).

EUX (Mix of EUD + Academic Courses)

- **Focus:** Like EUD, but also gives access to university later.
- **Best for:** If you want a job quickly but also want the option of higher education.
- **Duration:** Slightly longer than EUD.

What to Think About When Choosing:

1. **What are you good at and what do you enjoy?**
 - Like science? Look at **HTX**.
 - Like business? Try **HHX**.
 - Like hands-on work? Explore **EUD/EUX**.
2. **Do you want to study at university one day?**
 - Then **STX**, **HHX**, **HTX**, or **EUX** are good options.
3. **Do you want to start working soon and earn money?**
 - Then **EUD** or **EUX** might be better.

My Suggestion (based on your age and background):

Since you're fluent in Danish and just finished primary school in Denmark, and unless you already have a strong interest in a trade or technical skill, I would **recommend starting with STX**. It gives you the most options later, and you'll have time to discover what you want to study or work with in the future.

If you know you're more practically minded and want a career sooner (or are already interested in a trade or IT), **EUX** is a strong and flexible choice too.

Final Advice:

- **Visit open house events** at local schools (STX, HTX, EUD, etc.).
- **Talk to a vejleder (student counselor)** at Ungdommens Uddannelsesvejledning (UU) – they're free and helpful.

- **Don't worry about choosing "perfectly" right away.** You can always change paths later if needed.

If you tell me more about your interests (hobbies, subjects you like, or jobs you admire), I can give more personal guidance.
