

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Syrian Arab Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — and congrats on finishing primary school! That's a big step. Since you're in Denmark and have completed **Folkeskolen**, your next educational step depends on your interests, strengths, and whether you're more into **academic studies**, **hands-on learning**, or a **mix**. Here's a breakdown of your main options after 9th or 10th grade:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are for students who want to go to university eventually.

- **STX (Studentereksamen)**: Broad academic focus (science, languages, social studies). Good if you're unsure and want to keep many doors open.
- **HHX (Higher Commercial Examination)**: Focus on business, economics, and marketing. Great if you're interested in business, trade, or management.
- **HTX (Higher Technical Examination)**: Focus on technology and science. Good for those interested in engineering, IT, or innovation.
- **HF (Higher Preparatory Examination)**: A 2-year program (after 10th grade), often more flexible, suitable for mature students or those who want a shorter path to higher education.

✅ **Recommended if:** You enjoy schoolwork, want to go to university, and are interested in broad academic subjects.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

More hands-on, practical education that leads to a skilled trade or profession.

- Examples: Electrician, carpenter, hairdresser, chef, IT support, healthcare worker.
- You can start directly after 9th or 10th grade.
- Includes **school + apprenticeship** in a real company (you get paid during the apprenticeship).

✅ **Recommended if:** You like working with your hands, prefer real-life experience, and want to get into the job market earlier.

🔄 3. Kombineret ungdomsuddannelse (KUU) or EUX

- **EUX:** Combines vocational training **with academic subjects**, so you can both **work** and **go to university** later.
- Good option if you're interested in doing a trade but don't want to close the door on further studies.

✓ **Recommended if:** You want both practical skills and academic qualifications.

What to consider before choosing:

1. **Do you enjoy schoolwork or prefer doing practical things?**
 2. **Do you want to go to university one day?**
 3. **What subjects interest you most right now?**
 4. **Do you want to start earning money earlier, or study longer?**
-

A few personal suggestions:

- If you **like school and want flexibility**, go for **STX** or **EUX**.
 - If you're interested in **technology or IT**, consider **HTX** or **EUX in IT**.
 - If you're drawn to **business or finance**, **HHX** is a good fit.
 - If you're more into **getting a job soon and learning on the job**, an **EUD** with apprenticeship can be very rewarding.
-

Would you like help finding schools near you or exploring career paths in specific fields (like healthcare, IT, construction, etc.)? I can help tailor your path based on what you enjoy or are curious about.
