

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tajikistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background! At 16 in Denmark, you're at an important decision point after finishing **Folkeskole (primary/lower secondary school)**. Since you're fluent in Danish and grew up in Denmark, you have full access to the regular educational system. Here are your main options, with recommendations based on different goals:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year academic programs preparing you for university. Good if you're aiming for higher education.

Main types:

- **STX (Studentereksamen)**: Broad and academic (humanities, social sciences, natural sciences).
- **HHX (Handelsskolens studentereksamen)**: Focus on business, economics, international trade.
- **HTX (Teknisk studentereksamen)**: Focus on science, tech, and innovation.
- **HF (Højere Forberedelseksamen)**: 2-year, more practical, for adults or students who want a shorter academic path.

Recommended if:

You like academic subjects, want to go to university, and are still exploring your interests.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeship. You get real job experience and qualifications.

Areas include:

- Health and care
- IT and tech
- Construction
- Business and administration
- Food and hospitality

Recommended if:

You like hands-on learning and want to work right after school or in a skilled trade.

3. EUX (Hybrid – Vocational + Academic)

A powerful combo of EUD and a gymnasial exam (like STX). Takes a bit longer (4–5 years), but gives you both practical skills and university access.

Recommended if:

You want the best of both worlds – the ability to work or go to university.

How to decide?

Ask yourself:

- Do I enjoy studying academic subjects? (→ go for STX/HTX/HHX)
- Do I want to start working earlier or learn a trade? (→ EUD)
- Am I unsure, but want to keep options open? (→ EUX or STX)

You can also talk to a **UU-vejleder** (youth guidance counselor) – every municipality in Denmark offers free career/education guidance for students like you.

My Suggestion:

If you're unsure but academically capable and curious, **STX or EUX** would be great options. Especially if you think you might want to go to university one day but also like the idea of practical skills.

If you're more hands-on, curious about business or tech, **HHX or HTX** might suit you better.

Want help choosing between specific programs or schools near where you live? I can help with that too. Just let me know your town or region.
