

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tajikistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! You're at a great point in life to start shaping your future. In Denmark, after finishing **primary school (folkeskole)**, you typically choose between **three main educational paths** depending on your interests, skills, and goals:

🧠 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university.

- **STX (Studentereksamen)** – Broad and academic, with a mix of humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focuses on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Emphasizes science, technology, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year academic program, often for students who want a more practical or shorter route to university.

📌 Choose this path if:

You like academic subjects and might want to go to university later.

🔧 2. Erhvervsuddannelser (Vocational Education – EUD)

This path combines school with hands-on experience through apprenticeships (praktik).

- You can train to become things like electrician, mechanic, chef, healthcare assistant, carpenter, etc.
- Shorter education (2–4 years) and leads to a job quickly.

📌 Choose this path if:

You prefer learning by doing and want a faster path into the job market.

🎓 3. Kombineret ungdomsuddannelse (KUU) / Produktionsskole / FGU (Forberedende Grunduddannelse)

A more flexible and supportive option for those who aren't ready for gymnasium or EUD. Focuses on personal development and figuring out what you want.

📌 Choose this path if:

You're unsure about what to do next and need time to explore or get stronger academically/socially.

My Recommendation for You:

Since you're fluent in Danish and have just finished primary school:

💡 **If you enjoy school and think you might want to go to university one day:**

Go for STX or HHX, depending on whether you're more into general subjects or business.

- **STX** = great if you're still figuring out what you like.
- **HHX** = perfect if you're interested in business, marketing, or starting your own thing someday.

👜 **If you prefer practical work or already know what you want to do:**

Consider EUD — you can become skilled in something and start earning faster.

Bonus Tips:

- Talk to your **school guidance counselor (UU-vejleder)** — they can help with your choices.
- You can always switch paths later — nothing is set in stone.
- Consider what **you enjoy doing**, and not just what others expect of you.

Would you like help exploring careers based on your interests or strengths?
