

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tajikistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's awesome that you're thinking ahead about your future. Since you're 16 and have finished primary school in Denmark, your next step will likely be **either a general upper secondary education or a vocational education**. Let's break down your main options, and then I'll give you some tailored advice.

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

These programs prepare you for university or other higher education.

Main options:

- **STX (Alment Gymnasium)** – Broad academic program, includes humanities, social sciences, and natural sciences.
- **HHX (Handelsgymnasium)** – Focuses on business, economics, and international affairs.
- **HTX (Teknisk Gymnasium)** – Focuses on science, technology, and engineering.
- **HF (Højere Forberedelseksamen)** – A shorter (2-year) general program, good if you want a flexible path.

Best if you:

- Like academic subjects.
- Want to go to university in the future.
- Are still exploring career options.

🔧 2. Vocational Education and Training (EUD - Erhvervsuddannelse)

This is hands-on and career-oriented. You split time between school and internships (praktik).

Examples:

- Electrician, mechanic, chef, carpenter, social worker, health assistant, etc.

Best if you:

- Prefer practical, hands-on learning.
- Want to start working sooner.
- Are interested in a skilled trade or profession.

3. Combination Programs (EUX)

This combines vocational training with academic courses — you get both a studentereksamen (upper secondary diploma) **and** a vocational qualification.

Best if you:

- Want the option to go to university **and** have a practical profession.
- Like both school and practical learning.

My Advice for You

Since you're fluent in Danish, born and raised here, and just finished primary school, all options are open to you.

Ask yourself:

- Do I enjoy school and academic subjects?
- Am I more hands-on and practical?
- Do I want to go to university later or start working sooner?
- Do I have a specific interest or dream career already?

Based on your background:

- If you're interested in broad academic learning and possibly going to university: **STX or HHX** could be a good choice.
- If you're curious about business or international work (especially given your multicultural background): **HHX** could be very fitting.
- If you want flexibility between academic and practical learning: **EUX** is an excellent hybrid path.
- If you're hands-on and want to enter the workforce in a skilled trade: **EUD** is a great route.

Would you like help comparing STX, HHX, HTX, HF, EUD, or EUX in more detail?

Or tell me your interests (e.g., tech, people, business, health, arts), and I can suggest a more specific path.
