

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Thailand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful context. Since you're 16, just finished **primary school** in Denmark, and are fluent in Danish, you're at a natural transition point where you can choose between different types of **youth education (ungdomsuddannelser)** in the Danish system.

Let's go through your main options and how you might choose between them:

1. General Upper Secondary Education (Gymnasiale uddannelser)

These are more academic and prepare you for university.

Main types:

- **STX (Almen studentereksamen)**: Broadest and most common.
- **HHX (Højere handelseksamen)**: Focus on business and economics.
- **HTX (Højere teknisk eksamen)**: Focus on science and technology.
- **HF (Højere forberedelseksamen)**: Shorter (2 years), more practical – good if you prefer smaller groups or an easier transition.

Choose this path if:

- You enjoy school subjects like languages, science, history, etc.
- You're interested in going to **university** eventually.
- You're not yet sure what you want to do, but want to keep many doors open.

2. Vocational Education and Training (Erhvervsuddannelser - EUD/EGU/EUX)

These combine school with **practical work experience** (apprenticeships). You learn a trade and can start working earlier.

Examples:

- Electrician, carpenter, hairdresser, chef, IT support, health care assistant, etc.

EUX is a special path:

- Combines vocational training with academic subjects, so you can also go to university later.

Choose this path if:

- You like **hands-on learning** and working in a real-world setting.
 - You want to **enter the job market** sooner.
 - You have a specific career (like electrician, chef, or mechanic) in mind.
-

👁️ How to Decide?

Here are some **questions** to help you think about it:

1. Do you enjoy schoolwork and want to study more?

- Yes → Gymnasiale (STX, HHX, etc.)
- No / Prefer working with your hands → Vocational (EUD/EUX)

2. Do you have a dream job yet?

- No → Consider STX or HHX to keep many options open.
- Yes → If it's something like IT support, chef, mechanic → Vocational or EUX.

3. Do you want to go to university someday?

- Yes → STX, HHX, HTX or EUX
 - No / Not sure → EUD might still be a good fit.
-

✅ Final Thoughts for You

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school:

- If you **like school and want to explore more academic subjects**, I'd recommend looking into **STX** or **HTX** — they're great for keeping your options open, especially if you're still figuring things out.
 - If you're **more practical or career-focused**, **EUX** could be a smart choice — you learn a trade but can still go to university later if you change your mind.
-

Would you like help comparing some specific schools or programs near where you live in Denmark? Or want help deciding between STX and EUX, for example?
