

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Thailand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead about your education. Since you've just finished **primary school (folkeskole)** in Denmark and you're around 16, you're at the typical age to decide between several different **youth education paths**. Here's a breakdown of your options and some guidance based on your situation:

Main Educational Paths After Folkeskole in Denmark

1. General Upper Secondary Education (Gymnasiale uddannelser)

These are academically focused and prepare you for university.

- **STX (Studentereksamen)** – broad general education; good for university.
- **HHX (Higher Commercial Examination)** – business and economics focus.
- **HTX (Higher Technical Examination)** – science and technology focus.
- **HF (Higher Preparatory Examination)** – shorter (2 years), more flexible, often for those who didn't take 10th grade or want a more mature environment.

✓ Best for you if:

- You're interested in continuing to university.
- You enjoy academic subjects.
- You're unsure what you want long-term but want to keep doors open.

2. Vocational Education and Training (EUD)

You learn a trade or profession (e.g., electrician, chef, hairdresser, health care assistant), combining school with internships (praktik).

✓ Best for you if:

- You like learning by doing.
- You want to work in a specific skilled job soon.
- You want a fast path to employment.

3. Kombinerede forløb (EUX)

Combines vocational training with academic subjects so you can both **work in a trade** and **go to university later**.

✓ **Best for you if:**

- You like practical work but also want to keep the option of higher education.
- You're hardworking and ready for a challenging combo.

4. 10th Grade (10. klasse)

Optional extra year if you feel you need to mature more, improve grades, or explore options.

✓ **Best for you if:**

- You're unsure of what to choose.
- You want more time to decide or improve your grades.
- You want to attend an **efterskole** (a boarding school with focus on personal development, interests, or sports).

My Advice Based on Your Background

Since you:

- are fluent in Danish,
- were born and raised in Denmark,
- have just finished primary school,
- and haven't chosen a clear direction yet...

I recommend you consider:

Option 1: 10th Grade at an Efterskole

- Great way to discover your interests, build confidence, and meet new people.
- Especially good if you feel unsure or want a fresh experience.
- Many efterskoler offer creative, tech, or international programs that might appeal to you.

Then, after 10th grade:

Decide between STX/HHX/HTX or a vocational path based on what you learned about yourself.

Option 2: STX or HHX

- Choose STX if you like subjects like literature, history, and sciences.
- Choose HHX if you are interested in business, marketing, or economics (and maybe want to run your own business someday).

✨ **Personal Interests Matter**

To help guide your choice, ask yourself:

- Do I enjoy working with my hands or more with ideas?
- Do I want to work right after school or study longer?
- What subjects do I like the most?

I can help you explore careers based on your interests too — just let me know what you enjoy doing, and I can suggest fitting education and job options.

Would you like help with that?
