

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Timor-Leste. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps! In Denmark, after finishing **primary/lower secondary school (Folkeskole)** around age 16, you have a few main options depending on your interests, strengths, and future goals. Here's a breakdown to help you decide:

🧠 1. Gymnasium (General Upper Secondary Education)

- **Purpose:** Prepares you for university and higher education.
- **Duration:** 3 years
- **Options:**
 - **STX (Studentereksamen):** Broad and academic, includes humanities, sciences, and social sciences.
 - **HHX (Higher Commercial Examination):** Focus on business, economics, and marketing.
 - **HTX (Higher Technical Examination):** Focus on technology, natural sciences, and IT.

Good if you:

- Like school subjects and want to go to university later.
- Are unsure what you want, but want to keep your options open.

🔧 2. EUD (Erhvervsuddannelse / Vocational Education and Training)

- **Purpose:** Prepares you for a trade or skilled profession.
- **Duration:** 2–4 years, includes both school and apprenticeship.
- **Examples:**
 - Electrician, carpenter, hairdresser, chef, mechanic, etc.

Good if you:

- Prefer hands-on learning and practical skills.
- Want to start working sooner or earn money during training.

🔄 3. Kombinationsuddannelser (EUX – Vocational + Academic)

- **Purpose:** Combines vocational training with academic subjects.

- **Duration:** 4–5 years
- **Gives you:** Both a skilled trade and access to university.

Good if you:

- Want both practical skills **and** the option to study later.

Bonus Considerations for You

As someone with a background from **Timor-Leste**, you might also think about:

- **Global opportunities:** Consider learning more languages (like English, Portuguese, or Tetum) if you're interested in international work, diplomacy, or NGOs.
- **Community impact:** You could also look into fields where you could give back — like education, healthcare, or development work.
- **Cultural strengths:** If you have cultural knowledge from both Denmark and Timor-Leste, you could have a unique advantage in areas like international relations, social work, or multicultural communication.

How to Decide

Ask yourself:

1. Do I enjoy academic subjects like math, science, languages, or literature?
2. Would I rather work with my hands or in a practical job?
3. Do I want to go to university someday?
4. What are my dreams or role models doing?

You can also try:

- **Talking to a guidance counselor (Studievejleder)**
- **Trying a “brobygning” or internship** (a short course or work experience to try out an education path)

My Recommendation (if you're unsure)

Go for **STX** or **EUX** if:

- You want to keep your future open.
- You're still figuring out what you want to do.
- You enjoy learning and want to explore more before committing.
