

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Togo. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead about your education. Since you're 16, have completed primary school in Denmark, and are fluent in Danish, you're likely choosing between different **youth education paths** (*ungdomsuddannelser*). In Denmark, the next step typically depends on your interests, strengths, and whether you prefer **academic studies**, **practical skills**, or a combination.

Here's a breakdown of your main options and recommendations based on different directions you might want to take:

🎓 1. Gymnasiale uddannelser (Upper Secondary General Education)

These are best if you're considering going to university or want to keep your options open.

Options:

- **STX (Alment gymnasium)** – General and broad academic program. Good for university later.
- **HHX (Handelsskole)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and innovation.
- **HF** – A 2-year program (usually for slightly older students or those with special circumstances).

✅ *Recommended if you enjoy school subjects, want a flexible future, or are unsure of your exact career path.*

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you're more hands-on or want to start working sooner in a trade or craft.

Examples:

- Electrician, carpenter, hairdresser, chef, healthcare assistant, IT support, etc.
- You can start with **Grundforløb 1 og 2**, then go into **praktik** (apprenticeship) and **hovedforløb**.

✅ *Recommended if you prefer practical learning and want a job-oriented path with good pay and job security.*

💡 3. EUX – Kombineret erhvervsuddannelse og gymnasial eksamen

A combination of vocational training and a high school diploma. You get both practical skills *and* the option to apply to university.

✓ *Recommended if you're ambitious, want job skills, but also want to keep the door open to higher education.*

♥ Personal Advice Based on Your Background:

Since you're bilingual, have multicultural roots, and just finished primary school in Denmark, you have a strong foundation. Here are a few specific ideas:

- If you enjoy learning and think you might want to go to university later: **STX** or **EUX** are great options.
 - If you're interested in international business or economics (especially considering Togo's French-speaking and trading connections): **HHX** could be a smart fit.
 - If you like technology, math, or science: **HTX** or **EUX with a tech specialty** could be ideal.
 - If you prefer hands-on work and want to earn faster: **EUD** in a skilled trade (like IT, electrical, or healthcare) can be a strong choice.
-

Next Steps:

1. **Visit an "ungdomsuddannelsesvejleder" (youth education advisor)** at your school or kommune – they can help you apply.
 2. **Try out "brobygning" or "praktik"** – short trial periods where you can experience different programs.
 3. **Consider your long-term goals** – do you want to study further? Work early? Move abroad someday?
-

If you tell me more about your interests — like what subjects you enjoy or what kinds of jobs you imagine doing — I can give you a more personalized recommendation!
