

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Togo. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you just finished primary school in Denmark and you're 16, you're likely at a point where you're choosing between the main upper secondary education paths. Denmark offers several strong options depending on your interests, goals, and how you like to learn.

Here's a breakdown of the **main educational paths after primary school** in Denmark:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for university and other higher education.

A. STX (Studentereksamen)

- **Focus:** Broad general education – languages, social studies, science.
- **Good for:** Students who want many options for university later.
- **Recommended if:** You're curious, academic, and like traditional schoolwork.

B. HHX (Higher Commercial Examination)

- **Focus:** Business, economics, marketing, and international relations.
- **Good for:** Future businesspeople, entrepreneurs, or those interested in commerce.
- **Recommended if:** You're interested in working in business or finance, or maybe even starting your own company.

C. HTX (Higher Technical Examination)

- **Focus:** Technology, natural sciences, innovation.
- **Good for:** Future engineers, designers, tech enthusiasts.
- **Recommended if:** You're hands-on, interested in science/tech, and enjoy problem-solving.

D. HF (Higher Preparatory Examination)

- **Focus:** Shorter and more practical than STX; 2 years.
- **Good for:** Students who want quicker access to certain types of higher education.
- **Recommended if:** You want a more direct, less theoretical route to further studies.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship (praktik).

- **Focus:** Skills for specific jobs – e.g., electrician, carpenter, hairdresser, chef, health care worker.
- **Good for:** Hands-on learners who want to start working sooner.
- **Leads to:** Job qualification or the option to continue education through EUX.

Bonus: EUX – Vocational + Academic Track

- **Mix of EUD + Gymnasial**
- **Great if:** You want a skilled trade **and** keep the door open for university.

So, what should *you* choose?

Here are some guiding questions:

- Do you enjoy academic learning (like writing, theory, research)?
- Are you more hands-on and like practical tasks or working with people?
- Do you want to go to university later?
- Are there areas you're passionate about (e.g., tech, business, health)?

Based on your situation:

- Being fluent in Danish and having cultural roots from Togo can be a great strength, especially in international business, social work, or global studies.
- If you're unsure, **STX** is a strong general path that keeps your options open.
- If you're interested in **business or economics**, **HHX** might be a great fit.
- If you like building or creating things, or you're good at science, **HTX** or **EUX** could suit you.

Tips:

- Visit open house events (åbent hus) at local schools.
- Talk to a **UU-vejleder (youth guidance counselor)** – they help students like you find the right path.
- Try an **intro course (brobygning)** if you're unsure – it lets you test different programs.

If you tell me more about your interests, I can help narrow it down even further. Would you like to?
