

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tonga. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! You're in an exciting phase where you have lots of possibilities ahead. Since you're 16 and just finished **primary school (folkeskole)** in Denmark, you're likely looking at **youth education (ungdomsuddannelse)** as your next step.

First, here are your main educational options in Denmark at this stage:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for university and are more academic in focus.

- **STX (Studentereksamen)** – Broad academic program (languages, humanities, sciences).
- **HHX (Higher Commercial Exam)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Exam)** – Focus on science, technology, engineering.
- **HF (Higher Preparatory Exam)** – Shorter 2-year course, good if you're unsure or need flexibility.

Choose this path if:

You like academic subjects, think you might want to go to university, or want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EUX)

These are practical programs that prepare you for a job and often include apprenticeships (lærepladser).

- **EUD** – Focus on trades like carpentry, mechanics, hairdressing, health care, etc.
- **EUX** – Combines vocational training with general subjects, so you can also go to university later.

Choose this path if:

You want to learn a profession, like working hands-on, and might want the option to study further.

So... what should *you* choose?

To help narrow it down, think about:

- Do you like school and studying?
- Are there subjects you're passionate about (science, business, healthcare, IT)?
- Do you prefer learning by doing rather than classroom learning?

- Do you want to go to university eventually?
-

Also consider your identity and background:

Your Tongan heritage can be a strength — bilingual/multicultural people often have great communication skills, adaptability, and global perspectives. If you're interested, there are paths in **international business, social work, education, or intercultural communication** that value this deeply.

Suggested next steps:

1. **Attend an educational guidance meeting (Studievalg or UU-vejledning)** – It's free, and they help students like you figure out what fits best.
 2. **Visit a few schools (åbent hus / open house events)** – See what each feels like.
 3. **Talk to your parents or someone you trust** – It's your choice, but their perspective matters too.
 4. **Try a “brobygning” (bridge-building program)** – You can test out both vocational and academic paths before deciding.
-

If you tell me more about:

- What subjects you enjoy or are good at,
- Whether you'd prefer practical or academic learning,
- And your long-term goals (if you have any),

...I can give you a more specific recommendation!

Would you like help exploring a specific path like STX, HHX, EUX, or something else?
