

Uddannelsesmuligheder efter grundskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Trinidad and Tobago. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot! At 16 in Denmark, you've just finished **grundskole (primary and lower secondary school)**, so your next step would typically be to choose a **youth education program**. The best path for you depends on your **interests, career goals**, and **learning style**. Here are the main options in Denmark after primary school:

♦ 1. Gymnasiale uddannelser (Upper Secondary Education – Academic Track)

These are good if you think you might want to go to university one day.

Main types:

- **STX** – General upper secondary school with a broad range of subjects.
- **HHX** – Focus on business, economics, and marketing.
- **HTX** – Focus on technology and natural sciences.
- **HF** – A 2-year program that's a bit more practical, good if you're unsure or need a more flexible path.

Best for you if:

- You enjoy academic subjects like science, literature, social studies, or economics.
- You're thinking of university, but not sure which subject yet.
- You prefer a classroom and theoretical setting.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – VET)

These prepare you for a skilled trade or job, with a mix of school and apprenticeships.

Fields include:

- Technology & IT
- Business & administration
- Health & care
- Hospitality & food
- Crafts (like electrician, mechanic, chef, etc.)

Best for you if:

- You prefer hands-on learning and real-world experience.
- You want to get a job earlier or aren't sure about university.
- You're interested in a specific trade or career path.

Some VET programs also allow access to higher education later.

◆ 3. Combination programs

- **EUX** – A mix of vocational and academic education. You get a VET certificate **and** a general upper secondary exam. It takes longer but gives you both job and university options.
-

💡 Personal factors to consider

- Do you like theory, or prefer doing things hands-on?
 - Do you want to go to university later?
 - Do you have any passions — like business, tech, social work, or arts?
 - Are there role models or jobs in your family that inspire you?
-

🔍 My recommendation (based on what you've shared):

Since you're fluent in Danish and have roots in a multicultural background, you may have great communication skills and adaptability. If you're not sure yet what you want to do, **STX** or **HF** can keep your options open. But if you're motivated by doing and earning faster, then **EUX** or a **VET** program in something you're interested in (like IT, culinary, or health) could be great.

Would you like help exploring specific careers or schools in your area? Or do you want to do a short test to help find your interests?
