

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tunisia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great starting point. At 16 in Denmark, you have several options after finishing **folkeskole** (primary/lower secondary school). The best path depends on your **interests, strengths, and goals** (like whether you're more into hands-on learning or academic studies).

Here's a breakdown of your main options, with suggestions tailored to your situation:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

If you enjoy school and want to keep the door open for **university**, this is a good route.

➤ STX (Almen studentereksamen)

- Broad general education with focus on humanities, sciences, and social studies.
- Best if you're interested in subjects like history, literature, biology, or languages.
- Prepares you for nearly all types of higher education.

➤ HTX (Teknisk studentereksamen)

- Focuses on science, technology, IT, and innovation.
- Great if you're into science, engineering, or computers.
- Still academic, but more technical than STX.

➤ HHX (Handel studentereksamen)

- Focus on business, economics, and international trade.
- Good if you're thinking about business school, marketing, finance, or entrepreneurship.

➤ HF (Højere Forberedelseksamen)

- 2-year academic program, more direct and less broad than STX/HTX/HHX.
- Great if you want to finish faster and maybe had a harder time in school but still want to study after.

🔧 2. Erhvervsuddannelse (VET – Vocational Education and Training)

If you prefer practical work or want to start earning earlier, this might be perfect.

- Combines school with apprenticeship (praktik).
- You can train to become a mechanic, carpenter, electrician, hairdresser, chef, social care worker, and more.
- Takes about 3-5 years depending on the program.
- You still have a chance to go to higher education later (e.g., **EUX**, see below).

► **EUX**

- Mix of vocational training + academic studies.
- You get both a vocational qualification and a studentereksamen (like HHX/STX).
- Takes a bit longer, but gives you a lot of flexibility.

Considering Your Background

You mentioned your parents are from Tunisia — that's a great asset. Being multicultural and fluent in Danish could open extra doors:

- Consider careers where languages and intercultural understanding matter (e.g., international business, diplomacy, tourism, translation, social work).
- You might also think about subjects like **global studies**, **Arabic**, or **political science** down the line.

What Should You Think About Now?

Ask yourself:

- Do I enjoy academic subjects or prefer hands-on learning?
- Do I want to go to university later?
- Do I want to start working earlier?
- What subjects or activities make me feel motivated?

A Few Next Steps

- Talk to your **UU-vejleder** (Youth Guidance Counselor) — they can help you plan.
- Visit **uddannelsesguiden.dk** and try their career quizzes.
- Visit local **open house events** at gymnasiums or vocational schools near you.
- Think about trying **brobygning** (introductory courses) in the fall — it helps you get a feel for different paths.

If you tell me a bit more about your interests (e.g., what school subjects you like, if you want to study at university, etc.), I can give a more personalized recommendation.
