

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Turkmenistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be—having just finished primary school and considering your next step. In Denmark, after **primary/lower secondary school (folkeskole)**, you typically have a few main educational paths to choose from, depending on your interests, goals, and how you like to learn.

Here's a breakdown of the main options and my guidance for you:

## 1. Gymnasiale uddannelser (Upper Secondary Education – Academic Path)

These are more academic and prepare you for university later.

**The most common types:**

- **STX (Studentereksamen)** – general academic subjects (sciences, humanities, languages).
- **HTX** – technical and science-focused (great if you like tech or engineering).
- **HHX** – business and economics-focused.
- **HF** – a shorter 2-year version (for those who might have taken a break or want a faster path).

 **Good if you:**

- Enjoy studying subjects in depth
- Might want to go to university
- Like academic work or don't mind it

## 2. Erhvervsuddannelser (Vocational Education – Practical Path)

These programs combine school and work experience (apprenticeship) and prepare you for a specific job or trade (e.g., carpenter, electrician, hairdresser, social worker assistant).

 **Good if you:**

- Prefer hands-on work and learning by doing
- Want to work sooner
- Know what kind of job you'd enjoy

You can always take **“eux”**, which combines vocational training with more academic subjects, so you keep the option to go to university later.

### 3. 10th Grade (10. klasse)

If you're unsure what you want to do next, taking a 10th year at school can help you grow, explore your interests, and get ready for the next step. You can do this at a **folkeskole**, **efterskole** (boarding school), or **production school**.

#### Good if you:

- Aren't sure what to choose yet
- Want a year to mature, make new friends, or improve skills
- Want to try something new like music, sports, or travel

### My Recommendation (Based on You)

Since you:

- Are 16
- Fluent in Danish
- Just finished primary school in Denmark
- Have a multicultural background

I suggest asking yourself:

1. **Do I enjoy school and studying different subjects?** → If yes, consider **STX**, **HTX**, or **HHX**.
2. **Do I want to work with my hands or start a career soon?** → Then a **vocational education** or **eux** could be a great fit.
3. **Am I unsure?** → A **10th grade year** at an **efterskole** might be a fun, meaningful way to figure out your direction.

### Final Tips

- Visit open house events at schools.
- Talk to a **UU-vejleder (youth guidance counselor)** – every municipality has one.
- Ask your teachers or others who know you what they think would suit your strengths.

If you'd like, I can help you compare two paths you're thinking about or suggest schools near where you live. Just let me know!
