

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tuvalu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! You're at a great point in your life to explore your interests and set a direction for the future. Since you've just finished **primary school** in Denmark, you're likely deciding between different **youth education options**. Here are the main paths available to you in Denmark after 9th grade (or 10th, depending on your route), along with some advice to help you choose:

1. General Upper Secondary Education (Gymnasiale uddannelser)

This path is for you if you're interested in going to **university** later.

- **STX (Studentereksamen):** Broad academic education with subjects like science, languages, history, and social studies.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focus on science, technology, and IT.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical; good for adults or those who didn't go the standard route.

✓ Good if:

- You enjoy academic subjects.
- You're thinking about university or higher education.
- You're not yet sure what career you want, but want to keep your options open.

2. Vocational Education and Training (Erhvervsuddannelse - EUD)

This path prepares you for a **specific job or trade** (e.g., carpenter, electrician, social worker, healthcare assistant).

- Combines school and paid internships (praktik).
- You can start earning early.
- Leads to a skilled profession, but **also** allows later access to higher education if you want.

✓ Good if:

- You like practical, hands-on work.

- You want to enter the job market earlier.
- You already know what trade or type of work you're interested in.

3. 10th Grade (10. klasse)

An extra year after 9th grade to mature, explore interests, or boost grades.

✓ Good if:

- You want more time to decide.
- You want to improve your skills before entering gymnasium or vocational training.
- You want to go to an **efterskole** (a special type of boarding school with personal development, activities, and education).

How to Decide?

Here are some things to think about:

1. What subjects do you enjoy the most?

- If you like science and math: HTX.
- If you like language and social studies: STX.
- If you're interested in business: HHX.
- If you like doing things with your hands or being active: EUD.

2. Do you want to go to university someday?

- Choose STX, HHX, or HTX.

3. Do you want to start working sooner?

- Consider EUD or a combination of EUD + EUX (vocational + academic).

4. Do you feel ready for the next step or want more time?

- 10th grade or efterskole can give you space to grow.

✨ Personal Perspective

Being fluent in Danish and having a multicultural background (Tuvaluan and Danish) is a **huge strength**. If you're interested, careers in **international relations, global health, languages, sustainability**, or **multicultural communication** might be worth exploring in the future — especially since Tuvalu is so connected to global climate issues.

If you tell me a bit more about:

- Your favorite subjects
- What you enjoy doing in your free time
- Whether you want to go to university or not

...I can help you narrow it down even more.
