

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tuvalu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—that helps a lot. Since you've just finished **primary school** in Denmark and are **16 years old**, you're at a key decision point in the Danish education system. Let's walk through your main options and how you might think about them:

🎓 Your Options After Primary School (Folkeskolen)

1. Gymnasiale uddannelser (Upper Secondary Education) – If you're academic and like studying

- **STX (Alment gymnasium)** – Focuses on general subjects like languages, social studies, and sciences.
- **HTX (Teknisk gymnasium)** – Focus on science and technology.
- **HHX (Handels gymnasium)** – Focus on business, economics, and international trade.
- **HF (Højere forberedelseseksamen)** – 2-year program for students who want a shorter academic route.

✅ **Good if** you want to go to **university** or higher education later.

❗ **Challenging** if you're not into academic subjects.

2. Erhvervsuddannelser (Vocational Education and Training - EUD) – If you're practical and want job skills

- You learn **a trade** and alternate between school and internships in companies.
- Examples: electrician, carpenter, hairdresser, chef, social care worker, etc.

✅ **Good if** you want to **get a job quickly** and prefer learning by doing.

❗ You can still go to higher education later, but it might require extra steps.

3. Kombinerede forløb (EUX) – Best of both worlds

- Combines vocational training **and** academic qualifications.
- Prepares you for both **a trade job** and further study (like university).

✅ **Good if** you want **flexibility**.

❗ It's demanding – you need to handle both practical and academic work.

Questions to Ask Yourself

- Do I enjoy **school subjects** and studying, or do I prefer **hands-on work**?
- Do I want to go to **university** later, or start **working sooner**?
- Am I interested in areas like **technology, business, healthcare, social work, or the arts**?
- What **kind of lifestyle** do I imagine for myself?

Your Unique Strengths

As someone from a **Tuvaluan background** growing up in Denmark:

- You bring a **multicultural perspective**—that's a real asset in global industries.
- Your **Danish fluency** gives you full access to all Danish education paths.
- You could consider using your background in fields like **international relations, climate change, social work, or languages**.

A Suggested Path (If You're Unsure)

If you're still figuring things out, here's a **safe and flexible route**:

1. **Start with STX or HHX**, especially if you're generally good at school and might want university later.
2. If you prefer practical work, look at **EUX**—especially in fields like **IT, construction, or healthcare**.
3. You can always switch paths within the first months or year.

Want Help Choosing?

If you tell me more about:

- What subjects you like
- What kind of job or life you imagine
- Whether you like hands-on work or studying

...I can give you more specific suggestions (even examples of exact programs or schools near you).

Would you like that?
