

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tuvalu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school and are thinking seriously about your future — that's an important step. Since you're in Denmark and fluent in Danish, you have access to a strong and flexible education system with several paths depending on your interests, strengths, and long-term goals.

Here's a breakdown of your main options after primary school (folkeskole) in Denmark:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

This is a typical next step if you're aiming for university later.

a) STX (Almen Studentereksamen)

- **Focus:** Broad academic subjects (science, humanities, social sciences).
- **Good if:** You enjoy a mix of subjects and may want to go to university.

b) HHX (Højere Handelseksamen)

- **Focus:** Business, economics, marketing, and languages.
- **Good if:** You're interested in working in business or starting your own company.

c) HTX (Højere Teknisk Eksamen)

- **Focus:** Science, technology, engineering, and IT.
- **Good if:** You like tech, science, and practical problem-solving.

d) HF (Højere Forberedelseksamen)

- **Focus:** Shorter, more focused education (2 years).
- **Good if:** You prefer a less intense program or are unsure about long-term academic study.

🔧 2. Erhvervsuddannelse (Vocational Education & Training, EUD)

- **Focus:** Practical skills — combining school and work (apprenticeship).
- **Fields:** Everything from carpentry, plumbing, and electricians to hairdressing, media, or healthcare.
- **Good if:** You prefer hands-on learning and want to enter the workforce quickly.

Some vocational programs can also lead to higher education later (called **EUX** if combined with academic courses).

What Should You Consider?

Here are a few questions to help decide:

- **Do you enjoy academic subjects or prefer practical work?**
 - **Do you like working with your hands or with ideas?**
 - **Are you interested in going to university in the future?**
 - **Do you have a dream job or area you're passionate about (e.g. business, design, tech, helping people)?**
-

A Possible Plan Based on Your Background

As someone born in Denmark, fluent in Danish, but with roots in Tuvalu, you have a unique perspective. If you're not sure yet what you want, you could:

- **Take STX** for a general academic education while keeping your options open.
 - Or, if you're more practical and want to learn a trade, **EUD or EUX** can get you job-ready **and** let you continue studying later if you choose to.
-

Next Steps

1. **Visit an "Uddannelsesvejleder" (Education Counselor)** — every school has one or you can visit an *UU-vejledning* center.
 2. **Consider visiting a few schools for open house (åbent hus)** to get a feel for the different environments.
 3. **Talk to family and friends** about their experiences and advice.
-

Would you like help comparing a couple of specific programs, or want suggestions based on your hobbies or favorite school subjects?
